West to accept Soviet initiatives criticism

BY JOHN WYLES IN DAVOS

MR Hans-Dietrich Genscher, the West German Foreign Minister, yesterday boldly called on the Western alliance to believe in the changes taking place in Soviet domestic and foreign policies and to negotiate a new set of economic and

arms control agreements. Our motto must be let us take Gorbachev seriously, let us take Gorbachev at his word," declared Mr Genscher in a major speech reflecting a new authority drawn from his Free Democratic Party's success in the recent West German elections. In the process he went much further than any Western leader has done in responding to developments in Soviet policy.

He was strongly sceptical of sug-gestions that Mr Gorbachev was seeking a breathing space in Mos-cow's relations with the West to allow time for domestic regeneration before resuming the "old expan-

The Soviet leader's initiative "could not be brushed off as propaganda," he said. "If today there is a The officials held 10 hours of in East-West relations after 40 years of confrontation, it would be a mistake of historic proportions for the West to let the chance slip," Mr Genscher told the World Economic Forum, an annual meeting of top politicians and businessmen, in Davos, Switzerland.

Against the background of Presi-

dent Ronald Reagan's political setbacks over arms to Iran and the apparent conviction that a positive Vestern response could help Mr Gorbachev overcome domestic opposition to his reforms, Mr Genscher seemed to be presenting himself as the West's potential interlocutor

with Moscow. Asserting that the Soviet leader's new domestic and foreign policies were "in the interests of the West," Mr Genscher claimed that Mr Gorbachev had clearly broken with the expansionist policies of the Brezh-

Syria, Iran in talks on Waite's safety Kidnappers

A SENIOR militia official in Beirut said negotiations involving Syria, Iran and Lebanese militia leaders were under way yesterday to determine the fate of Mr Terry Waite, special envoy of the Archbishop of Canterbury, AP reports from

"These hush-hush talks are in high gear," said the militia official, who spoke on condition of anonymity. "The parties concerned are burning the wires trying to ensure Mr Waite's safety. Plenty of Syrian and Iranian emissaries are shuttling back and forth.

"The lack of direct word from Mr Waite since his disappearance two weeks ago has alarmed all sides concerned and every effort is being made to find out about him," said the

Mr Waite flew to Beirut on January 12 on his fifth trip to Lebanon to negotiate for the release of abducted foreigners. He has not been heard from or seen since he left the Riviera Hotel in West Beirut on January 20, presumably to negotiate with Islamic Jihad, a pro-Iranian Shia faction that

holds two Americans.
Mr Walid Jumbistt, leader of the Druze, whose militia had been in charge of Mr Waite's security before his disappearance on Saturday, offered himself as a hostage to replace Mr Waite if reports of his

offer swap for 400 **Palestinians**

By Andrew Whitley in Jerusalem

THE KIDNAPPERS of four university lecturers—three Americans and an Indian—seized in Beirut nine days ago have demanded the release of 400 pri-soners being held by Israel in exchange for the hostages'

A statement issued over the weekend on behalf of the pre-viously unknown group, calling itself "The Islamic Jihad for the Liberation of Palestine," said the four would be killed if the prisoners were not released within a week.

In response, a spokesman for Prime Minister Yitzhak Shamir said yesterday that Israel would have nothing to do with the demands. He added: "I don't even think the Americans would expect us to." But the proffered exchange puts the Israeli Government on the spot

While taking a hard public White taking a naru pusha-line against any deals with terrorists, both the present administration and its pre-decessors have in practice been prepared to negotiate—and to exchange prisoners—when

Only last week, Mr Yitzhak Rabin, the Defence Minister, admitted to the Knesset (parliament) that one of the aims of the covert Israeli arms sale to Iran had been to secure the release of three Israeli servicemen believed to be held by the pro-Iranian Lebanese group, Hizbollah. Military analysts here believe the new group holding the university pro-fessors may also be linked to

In May 1985, Israel emptied its jails of 1,150 prisoners, some of them serving long jail sen-tences for terrorist offences, in return for three of its prisoners of war. The disproportionate scale of that swap generated considerable public criticism, Prominent Knesset members from all parties yesterday added to the pressure against giving in to the kidnappers' demands. Mr Dan Meridor, a leading Likud parliamentarian, said the May, 1985, exchange should not

against all forms of collaboraserve as a precedent.

It was not immediately clear which detainees the underground group has in mind as its statement referred vaguely only to "holy war strugglers held in Zionist Nazi jails in

Iraq's second city, Basra,

Agencies report.

The fighting, in which both sides are claiming successes. was reported as Iran started 10 days of celebrations marking the eighth anniversary of the Islamic revolution.

Iraq said its aircraft had

attacked six Iranian towns and cities in retaliation for Iranian raids on civilian targets, including a missile strike on Baghdad. It said its troops crushed Iranian "pockets" six miles south-east of Basra.

Baghdad also reported an air

strike on a vessel in the north-ern Gulf, which is believed to be the Iranian tanker, Khark 3.
Iran launched its offensive towards Basra on January 9 from the Iranian border village of Shalamcheh.

Quoting a communique on the latest battle reports. Tehran Radio said Iranian forces had advanced along the road from Shalamcheh to Basra and overrun the artillery centre of Iraq's 11th Division. Iranian forces report having

reached within six miles of Basra. Iran says the recent fighting has occurred in an area between 16 and 20 square miles wide, half of which is palm groves and the rest marshes and dry ground.

Germany's Greens d a leading lady

RIGH he end of the meal in a vegetarian restaurant hear the Frankfurt Bourse last week the elderly black-clad waitres? aproached Ms Jutta Ditfurth, squeezed her arm confidentially and opined, "We women need someone who can stick up for

Ms Ditfurth, 35, who has risen meteorically to become one of the leading lights in West Ger-many's Green Party, over the past week since Sunday's elec-tions has become used to being a well-known face.
"I am getting rung up and asked for interviews all the time—even from newspapers

who refused to employ me when I was a journalist," she says with a smile. The sharp witted and almost

unnervingly self-possessed Ms
Diffurth, one of the Greens'
three national spokespersons,
has been bathing in the glow of
victory in the wake of the
Greens' success in the West German elections eight days

ago. They chalked up 8.3 per cent of the votes (up from 5.6 per cent in the last elections in 1983). The result confirmed that the party, going beyond its original nuisance value role, now is a permanent and potent force in German politics.

Ms Diffurth, a social scientist born into a liberal bourgeois Frankfurt family (she has now dropped the aristocrate-sound-ing "von" from her name), symbolises the new confident face of the German left. She is also at the centre of a debate which is bound to occupy

ever more attention.

Will the Greens, now firmly tering the Bundestag, move to-wards an alliance with the main opposition Social Democratic Party (SPD) as a means of toppling the centre-right Bonn coalition?

same principles of protest on which it was founded seven years ago and refuse to have any truck with "compromise policies" of the SPD? Ms Ditfurth stresses she is not

Or will the party stick to the

David Marsh in Frankfurt meets Jutta Ditfurth, selfpossessed spokesperson of the Greens

tion with the SPD. But she sits very firmly in the so-called "fundamentalist" camp of the Greens which rules out any watering down of the party's radicalism — especially over its call for a prompt closure of German nuclear plants and an

exist from Nato. Ms Ditfurth is an ardent antinuclear demonstrator. Though not condoning violence, she says she "cannot distance her-self" from the growing number of people who are committing what is now a terrorist offence by sawing down electricity pylons.

Proclaiming that, "reforms can be pushed through in parliament only if the strength comes from outside," she has albetteened of extra-parlia-mentary protest ready won her spurs across the battlefield of extra-parlia-

Ditfurth: not for breaking

Greens, after some long drawn-out internal wrangling, to re-present the party in a TV debate with Chancellor Helmut Kohl and other top (male) politicians on the Thursday beTani

fore the poll. She probably won a sizeable number of extra votes for the number of extra votes for the Greens by marshalling her arguments and standing her ground under furious attack from Mr Franz Josef Strauss,

the Bavarian Prime Minister. Her composed exhortations to "calm down" to a fulminating Mr Strauss went down as one of the highlights of the election campaign.

Ms Ditfurth says she has already won over five of the immediate members of her family (including her father, scientist-cum-writer Hoimar von Ditfurth) to the Greens cause, Only her younger sister has

She has a good head for facts and figures over energy policy or chemical poliution. In contrast to Mr Strauss, she is diffi-cult to ruffle. She says she enjoys taking part in podium discussions with electricity industry representatives "be cause I normally win."

Yesterday in Frankfurt, she was scathing in her denunciation of overtures this week to the Greens from Mr Oskar Lafontaine, the 43-year-old Scar Prime Minister who is tipped to take over as the next SPD

chairman.

The SPD's policy of moving away from nuclear energy only with the "consensus" of the atomic lobby is "absurd," she

ays.
Provided the Greens continue to campaign on "authentic issues—peace, the atom and rights for women," the party should eventually be able to win over 20 to 30 per cent of the electorate, she believes.

The next few years will show whether the Greens break the mould of German consensus politics—or end up broken themselves. Yesterday, Ms Dit-furth as she rode away on her bicycle after the meal was not

India deal to be led by GEC

By John Elilott in New Delhi GEC, the British engineering and ronics group, has been chosen by the UK Government in preference to Northern Engineering Industries (NEI) to lead a consortium of British companies which hopes to build the second stage of the 2,000MW Rihand coal-fired power station in northern India at a cost of around £300m (\$454m).

The decision, which is a major blow for NEI's international reputation as a power station contractor, was taken by British Cabinet ministers at the end of last week after a heated battle between the two companies. It was confirmed over the tions.

first 1,000MW stage of the power station but has run into major managerial and construction problems which have resulted in it falling nine months, and maybe as much at 12 to 15 months, behind schedule.

Despite improvements during the past year, NETs right automatically to be the lead contractor on the proposed second stage has been quered by India's National Thermal Power Corporation, as well as by the UK's Department of Trade of

NEI said yesterday that it was disappointed at not being chosen as the lead contractor in the UK bid and acknowledged that this probably reflected delays in the first stage of the contract.

cial director at GEC Turbine Generators, declined to comment.

About half of the cost of the con-

tract is expected to be covered by British aid if the UK companies are awarded the work. The British Government was asked by India's Ministry of Power two months ago to put forward its financial and project management proposals so that negotiations could begin soon.

Because of the history of the first contract, in which the UK Government has been closely involved, this meant that the DTI had to take the unusual step of deciding which company to put in the lead.

Meanwhile, companies from other countries, including Siemens of West Germany, are believed to have indicated to the Indian Government that they were prepared to bid. The Indian Government is adept at playing rival tenderers off against each other. So the UK decided it GOVERNMENT troops in corpses was definitely not army credible package to try to prevent

government. coherent nationalism and economic conservatism.

Mr Nakasone has arrested the growth in Japanese Governterm finance.

Mr Prawiro said the debt to Government in business service ratio — debt repayment enterprises. Salt and Tobacco, the railways and the telephone company all have been or soon will be, privatised to make way for "private sector vitality," as they call it in Japan.

In both tendencies — the ideological and the practical it comforts some to see shades President Reagan and Mrs Thatcher. Japan, the protected and government-directed super-state of Asia, is it seems becoming more like us. But reality is not so simple.

Professor Chalmers Johnson, a political scientist at the University of California, Berkeley, in an essay on the "telecom wars" of 1981-85 (soon to be published), lays bare the process which led to the NTT float and listing.

Where most of his breed politely ignore the role of money in Japanese politics, Prof Johnson writes about it openly and perceptively. Where many assume a Westminster and Whitehall blueprint at their Tokyo equivalents of Nagatacho and Kasumigaseki. Prof Johnson realises that to do so is not only false but misleading. because they obscure the way Japanese politicians, bureau-crats and businessmen influence the process of policymaking.

He is critical of US policy-successfully blocked an MPT-makers and officials negotiating initiated bill that would have

TO THE outsider next week's with the Japanese for the best TO THE outsider next week's listing in Tokyo of stock in Nippon Telegraph and Telephone (NTT) appears another lateral trade deficit of \$1.5bn triumph for Mr Yasuhiro in 1985, the Reagan Administration was ken to see that ter and unJapanese apostle of Japan not only lived up to its free and unJapanese apostle of Japan not only lived up to its free enterprise and small commitment to buy more US government.

products, but that the price of entry into the telecommunications business after deregula-tion was not fraught with hid-"The Americans were usually

ineffective because they typically did not know what was going on within the Japanese Government and made their protests only to the Foreign Ministry or the Prime Minister," he says.

As he shows, the floating of NTT—the first tranche of 12.5 per cent of its stock raised \$14.5bn — has very little to do with conservative ideology and the aversion to government activity in areas where private interests ought to prevail.

The NTT privatisation was

about a power struggle between one powerful government ministry attempting to increase its power and another ministry recognising that it could grab power. A group of senior Liberal Democratic Party (LDP) politicians also stood to benefit, financially as well as in enhanced status.

The two ministries were International Trade and Industry (Miti), which had adminis-trative control over the electronics and computer industries, and the Posts and Telecommunications (MPT) which loosely regulated NTT, which in turn dominated telecommunications in Japan. The politicians were primarily from the Tanaka faction of the LDP and they cut a deal which opened up a whole new source of campaign contributions.

taneously. "The Telecom wars began in the autumn of 1981, when Miti

given MPT strong regulatory nowers over computer-connected

Prof Johnson Writes. They heated up during 1982 in the second value-added network campaign, spread to new fronts during 1983 over the issues of providing legal protection for the writers of computer programmes and the building of regional infrastructures for the 'informationised' society of the future (called 'teletopias' by Miti and 'new media communites' by MPT), and during 1984 and 1985 became a general conflagration with at least seven different going

The most important of these was the privatisation of NTT. The company had been domina-

who wanted it to remain a state talented bureaucrats. monopoly. Supporting them were the NTT cartel of major electronics manufacturers, led by NEC, and a group of senior politicians who specialised in MPT's jurisdiction known individually and collectively as the

A zoku is an LDP politician who has been re-elected at least five times. He has specialised in a particular area of government administration and is in many cases more experienced in policy work than the bureaucrats he meets daily. Before any legislation goes before the Diet (parliament) it must first pass the scrutiny of the relevant committee of the LDP and it is there, in the LDP's policy affairs research council, that the bureaucrat has to argue his case before the

The postal zoku -- the most senior of whom are members of the Tanaka faction—had con-cerned themselves with the post office, the distribution of local radio frequencies, and the issue

radio frequencies, and the issue of telephone charges — important areas of public policy for a largely rural-based party. In favour of privatisation were the members of the administrative reform council who recommended it, and Mitl, which thought (erroneously) that by privatising NTT the MPT would be weakened. Miti seriously underestimated MPT. The postal ministry had defined the ground rules with defined the ground rules with its initial draft law in February

1984. It made NTT private, put it under the supervision of the ministry, and made every attempt to keep out foreigners. Although Miti was able to chip away at MPT's bill it was never able to alter its premise that MPT had responsibility for the administration of telecommunications. As Prof Johnson explains, the deadlock between those who wanted NTT's priva- Ed. Jo tisation and those who did not coming.

The power politics of Japanese privatisation

Along with a loyal deputy and probably the second most powerful politician in telecommunications policy, Mr Shin Kanemaru, the top postal 20ku, Mr Kakuei Tanaka, came up with the basis of the law to privatise NTT. The monopoly would be privatised on April 1, 1985, two-thirds of the stock would be offered for sale over a five year period and one third would be kept by the Government. Dividends on the govern-ment-owned shares would fund a new government-owned telecommunications research faci-

The NTT family also had to be placated. No other industry has as many contributors of funds to the LDP in the top 10 as the electrical manufacturers. They were pleased with the new government research facility and with the prohibition on manufacturing—which ended any possibility of the private becoming a

competitor.

The process by which NTT became a private company is typical of policymaking in Japan. As Prof Johnson points out in his concluding remarks, for the businessman and government official wanting to affect the outcome of policy, it is critical to know players in both the bureaucracy and the LDP. "It is high time," he says "that foreign nations that are dissatisfied with Japanese governmental policies begin to match their rhetoric with some

Italy announces proposals to ease exchange controls

BY ALAN FRIEDMAN IN MILAN

DRAFT LEGISLATION designed to liberalise Italy's system of exchange controls was made public at the weekend by Mr Rino Formica, Minister of Foreign Trade.

The detailed legislative draft, an Italian response to EEC directives, contains 25 articles and proposes a variety of liberalisation measures related in the first instance to tourism and trade. It does not, how-ever, break ground in the nearterm on the export of currency for investment.

Controls on such capital outstage, under the proposals.

Both main Australian parties take comfort from polls

AUSTRALIA'S ruling Labor Party and the opposition Liberal Party both drew encouragement yesterday from the results of two important state-level by-elections held in Sydney constituencies on Saturday. Although Labor retained

both seats, it suffered a sub-stantial loss of support. But the votes went to a diverse group of independent candi-dates as well as the Liberals. With a federal election due

before April 1988, all eyes were on the outcome in New South Wales, not least because one of the contests was in territory covered by the Federal Constituency represented by Mr Paul Keating, the Government's controversial Treasurer.

The polls were also seen as a test for Mr Barrie Unsworth, the premier of New South Wales who took over the government and party leadership last year.

The reputation of both has been tarnished by scandals and corruption allegations. The by-elections sprang from the resignations of Labor members of the state A strong showing was neces-

sary for the Liberals because the party is divided over how to deal with hard-line conservative forces threaten-ing to take over the leading opposition role in Australia.

In a contest which was complicated by the decision of former Labor figures to stand for election parochial issues turned out to be as important as the state of the economy. The Liberals claimed yesterday that Labor's loss of support in its own strongholds pointed to a loss of power at the federal level, provided the conservative

vote was not split. However, as the lost votes drifted to independent candi-

dates, it is clear that the Liberals under Mr John Howard, their national leader, have yet to prove they can take on Labor.

Mr Bob Hawke, the Prime Mr Bob Hawke, the Prime Minister, who is now visiting the Middle East, yesterday welcomed the victory for Labor. Mr Unsworth said it vindicated his campaign strategy, which had involved most of the state cabinet knocking on neighbourhood doors appealing for votes. doors appealing for votes.

Union stands by for phones peace offer

BY CHARLES LEADBEATER, LABOUR STAFF

A TWO-YEAR agreement covering could be spread between the 1986 pay and productivity is under consideration by negotiators from British Telecom (BT) and the National Communications Union (NCU) as a possible solution to the week-long strike by 110,000 telephone

engineers.

The engineers' pay negotiators will report to the NCU's engineering executive today after the two sides held more informal talks yesterday. The executive is likely to sanction further negotiations with

However, the strike, which follows the breakdown of talks over the 1986 pay award, looks set to continue for some time. Union officials predict it will take several days to draw up an outline settle-

ment for the executive to consider. It is understood the negotiators are considering dealing with the productivity measures BT has proposed as a part of the 1987 pay award, which is due on July 1. This. may allow the 1986 pay award to be made without productivity strings, a key demand of the union. The changes to working practices engineers.

and 1987 settlements apparently to weaken the link between pay and productivity. Talks have ranged from considering modifications of the final offer BT made before the strike, to starting once again in drawing up a revised package. It is believed the two sides are al-

so discussing a framework agreement which would outline the timetable for further negotiations. Some union leaders believe as

agreed framework, containing a clear commitment from BT that it would improve its pay offer, and a similar commitment from the union to agree productivity measures, might provide the basis for a return to work. It is likely the union will ballot its members on whether to

return to work. Leaders of the NCU's 30.000strong clerical group, which is much closer to agreement, will today start formal negotiations with the company. Union leaders say a settlement to the clerical workers' pay claim is unlikely to have much impact on the talks covering the

Chunnel chairman's tenure in doubt

By Andrew Taylor

LORD PENNOCK'S future as British joint chairman of the Channel tunnel consortium appears increasingly in doubt following worries at the Bank of England and in Whitehall that the project is still not pro-

ceeding smoothly enough.

Mr Robin Leigh-Pemberton, governor of the Bank of England, is understood to have wanted Sir Nigel Broackes, chairman of Trafalgar House, the construction, shipping property and hotels, group, to replace Lord Pennock

This now seems unlikely, and there is speculation that Sir Nigel, currently reconsidering his role in Eurotunnel, could resign from the consortium. Senior officials at the Bank and

in Government are understood to be concerned that Enrotunnel has not made sufficient headway in establishing the management and organisation it needs to run a major international transport system.

The are particularly worried that detailed decisions on design and operating equipment and procedures are becoming bogged down and that more impetus is needed to sort out these areas.

the French participants in the project, with more experience in run-ning this kind of venture, could swamp the project unless the British side can organise itself better. There are worries whether Lord

Pennock, a main board director of merchant bank Morgan Grenfell, will be able to devote sufficient time to the Channel tunnel project, given the problems at the bank in the wake of the Guinness affair. Senior managers at Eurotunnel

say Lord Pennock might be prepared to stand down if he could be shown that the project would benefit from a change at the top and if a worthwhile successor could be found. The chances that this person

could be Sir Nigel Broackes looked unlikely last night. Sir Nigel has never publicly said that he wanted to be chairman, although he is known to be dissatisfied with his role at Eurotumel. Other British contractors among

the founding shareholders of Eurotunnel are also uneasy about Sir Nigel's presence in the consortium. A further complication is the position of Trafalgar House as a possible contractor to the project.

Sir Nigel joined the Eurotunnel

board under the prompting of the Bank of England last October after the consortium has struggled to raise £206m in an international share issue.

Either way, the decision over or stand down, seems likely to be resolved fairly swiftly if the project is not to be damaged by further

US toy groups 'responsible for volatile market'

By David Churchili

A WARNING that the UK toy market, which accounted for £870m in consumer spending last year, is be-coming increasingly volatile comes today from the Euromonitor market research company in a new report on the toys and games indus-

Euromonitor suggests that the reason for the volatile state of the market is aggressive US toy companies "piling into the UK with mam

moth advertising budgets."
The US toy company Mattel emerges in the Euromonitor report emerges in the Euromonitor report as the largest advertiser for toys in 1985, spending some £7.7m. The most heavily advertised toys were all Mattel brands – Barbie dolls (with £2.2m worth of advertising.) Rainbow Brite (£1.87m), and Mas-ters of the Universe (£1.5m). Hasbro-Bradley, another US toy company, spent some £6.4m on toy

company, spent some £6.4m on toy advertising in 1985.

Euromonitor points out that such large advertising budgets have not increased the overall demand for toys but merely stimulated sales of promoted toys at the expense of

"Retail sales in 1985 were just under 20 per cent higher than in 1982, which means that in real terms the market has grown by less than 1 per cent a year," says Euromonitor. Euromonitor's warning comes in the middle of the major UK toy trade exhibition taking place today at the Earl's Court exhibition centre in West London. Some 450 companies from 15 countries are showing the latest toys likely to be on offer

Euromonitor's report suggests that traditional toys, such as soft toys and model railways, have been coming back into popularity after the trend towards electronic toys in the early 1980s.

"Given the tendency of booming sectors to be periodically brought back to earth, however, it seems unlikely that soft toys can continue with their breakneck progress, while the recovery of the train set market will probably also slow," it

Suggests.
Euromonitor suggests the "best bet for recovery is scientific and educational toys."
"The Toys and Games Report, Euromonitor Publications, 87-88, Turnmill Street, London, EC1; £235.

The BMW 5 Series

Speaking of blue chips.

What he particularly admired about his investment analyst was his apparently unerring farsightedness.

He'd been proved right time and time again. Should he buy those Oyster-Oil shares and trade in his Peach holdings?

Japan's Sunny Electronics were looking particularly bullish. And on the foreign exchange market, everyone was agreed that the dollar could make up lost ground in the very near future.

When, a little later, the conversation came round to what

he should do with his German car industry investments, it seemed only natural that the subject of his new BMW 535i should come up. As close business friends, there seemed no harm in admitting that the 218 horsepower really did give a performance that was way above most people's expectations.

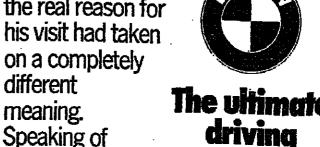

To calm his friend's growing look of anxiety, he also didn't forget to mention the superlative, road-hugging suspension or the standard ABS anti-lock braking system, which caters for reassuringly safe emergency braking even on a wet surface.

Somewhat surprisingly, the only question that was registered concerned the finishing quality and workmanship of his 535i.

Surprising, because up to now everyone else he'd spoken to had taken that for granted.

Quite right too, he thought. The time passed and, what with all the enthusiasm over his new BMW 535i, the real reason for

on a completely different meaning. Speaking of blue chips...

The ultimate machine

Twelfth year of Honeywell profits growth

BY TERRY DODSWORTH, INDUSTRIAL EDITOR

HONEYWELL Information Sys- this month the formal partnership tems of the UK, the British subsidiary of the US-based Honeywell computer and defence equipment group, achieved its twelfth successive year of profits growth in 1986.

Pre-tax profits jumped by 37 per cent to £23.7m from £17.3m, while turnover grew by 10 per cent to £177m from £161m. After-tax profits were up by a little over 60 per cent to £15.6m compared to £9.7m.

Employment in the group was stable during the year at 2,500, even though Honeywell has doubled output of its DPS 6 medium-range computer at its plant in Newhouse, La-narkshire over the last 24 months. About 40 per cent of Newhouse's production was sold in the export

Honeywell is due to announce

агтаngements drawn up last year with Bull of France and NEC of Japan. The three companies already collaborate extensively, and Mr Brian Long, chairman of the UK concern, said yesterday that these links had been an important element in the group's growth last

Mr Long also brushed aside in dustry suggestions that the UK market had flattened out in 1987. Competition was strong, he said but overall sales were still going up. Honeywell had been particularly helped by the addition to its range of the high-powered DPS 90 machine made by NEC – a mainframe computer which sells in the sector of the market where some manu-

Caterpillar workers dig in

James Buxton assesses the mood of the

BUT for the fact that there are only a handful of cars in the car park, the visitor to the Caterpillar earthmoving equipment plant at Uddingston, near Glasgow, might at first sight think it was business as usual,

A uniformed security guard checks your credentials, notes them in a book and issues a visitor's badge. Inside the Administration block there is a bustle of activity.

But it is a bustle not of managers

Brandon, a burly ex-miner who has but of men in open-necked shirts and pullovers, members of the workers' occupation committee who have been in charge of the plant since that snowy day a fortnight ago when the earthmoving equip-ment company in the US announced that it was shutting the

plant later this year. Caterpillar also announced the closure of two US plants – at Davenport, Iowa, and Dallas, Oregon. Even now there is still as much bewilderment as anger among the

men in Uddingston at the decision Only four months earlier the ompany had announced that it was investing £62.5m at Uddingston to streamline production and further raise efficiency. Uddingston was called "the plant with a future," and in the December 24 issue of the company newsletter Earthmover

as "being among the better per-forming plants" the company ran. TV station in Peoria, Illinois, where "They were professional, fair employers," says Mr John Brannan, the tough-looking chairman of the joint works committee who began

the occupation immediately the

employees' Scottish sit-in company announced its plans, to concentrate all the closures in

Since then there has been no con- the US, where the axe has usually tact with the plant's management.

"I trusted them," says Mr Pat Brandon, a burly ex-miner who has has wage costs that are only about worked at the plant for 15 years. On a walk round the vast, tidy 1.1m square foot factory, he points with pride to the new Italian and West workforce. But it failed to win the German robots that were already participation of the plant's middle being installed as part of the investment programme.

The reorganisation of production methods might have cost a few jobs eventually, but natural wastage would have taken care of them. This was a well-run plant," he says.

doesn't reopen I'll never get another job. And even if Caterpillar does change its mind and keep the plant going. I'll never trust them again." "We reckon the decision to shut the plant was politically motivated," says Mr John Gillen, a shop steward, in a conversation which is interrupted to allow the plant cleaners - working unpaid, like everyone else - to dust round the meeting the Scottish facility was described room, and halted by a call from a

> Caterpillar is based. Like others he believes that the company, faced with losses and alarmed by flat demand forecasts, chose to shut a European plant be-cause it would be politically difficult

fallen in the past and where the two plants are to go along with Uddingston. This is in spite of the fact that the Scottish plant is economic and

a third of those in the US. The occupation has the support of more than 1,000 of the 1,200-strong management and only four supervisors are taking part.

On each shift about 30 employees report for work, on a rota basis. Last week they assembled one D6H crawler tractor. It was painted pink - "any colour but yellow" - and was presented to Bob Geldor's Band Aid "Now I'm 52 and if the plant famine relief organisation.

The occupying workers are also beginning a programme of training different parts of the labour force to do each others' jobs. Forgetting any concept of demarcation, typists are meeting and none is expected this being trained to drive tractors, and fitters to operate VDUs.

The move has impressed industrialists in Glasgow who recall that the preservation of demarcation lines was assured at the outset in - the pioneer of this sort of protestin 1971. However, the pace of training appears less than hectic.

employer, or from the basis of a

workers' co-operative that could run the plant" Mr Brannan, the leader of the occupation, says: 'The first aim is to

get Caterpillar to change its mind The second aim is to find another solution for the plant." He would like the Government, which was prepared to make grants to Cateroillar's investment plan, to

direct the same funds to the work-

ers themselves if some form of cooperative were formed. Certainly Mr Malcolm Rifkind, the Scottish Secretary, who had made great play of the investment plan in recent months, has shown that he is no less furious with the decision of Caterpillar than the Ud-

But an icy encounter he had re-cently in London with Mr Peter Donis, the US president of caterpillar, produced no movement on the company side, although Mr Donis said he would report back to his board. Since then there has been no board

From their Glasgow hotel the plant's management gave warning that the workers' plan to assemble a tractor and hand it over to Band Aid was "unlawful." The men did the Upper Clyde Shipbuilders sit-in not have the right to use or dispose of property that did not belong to

There is enormous sympathy in Mr Gillen says: "The aim is to Scotland for the cause of the Catercreate a highly skilled, flexible pillar workers. But what is happenworkforce with interchangeable ing seems to be a holding operation.

HERE is something rather odd about the political debate on the scandals surrounding Guinness and its City advisers. One group of people, including most of the Opposition and a small but articulate band of City folk is calling for a statutory system of regulation for Britain's financial markets; they invoke the American model of the Securities and Exchange Commission. Another, spearheaded by the Department of Trade and Industry, busilv declares that we statutory statutory.

In contrast, the Takeover Panel, set up in response to scandals in 1969, is a genuine self-regulatory body, the last remaining outpost in the City of the old club ethic. It looks set to stay that way, so long as the Government remains un-willing to accept that, when the best names in the City play fast and loose with the panel's rules, statutory backing is over-

Services Act, which will lead to the Securities and Investments Board becoming the lynchpin of British securities regulation. And here we en-counter the Schleswig-Holstein

In 1982 he proposed that the most effective of the various than a mere wordsmith with a options for tightening up investor protection was to retain Until his move to the White

ment department or agency, which would act as the licensing authority for a handful of self-regulatory organisations.

The Professor's blueprint was an elegant hybrid, intended to combine the flexibility of self-regulation with the muscle of statutory backing. It became less elegant as the City's traditional fear of any kind of government agency was impressed on ministerial ears.

In 1982, a group of City dig-

markets; they invasion. Another, spearheaded by the Department of Trade and Industry, busily declares that we have a statutory system already.

It looks like a classic case of yes, and yet again, no, minister. A little clarification might be in order.

This is easier said than done. Britain's system of securities regulation has always been a hotchpotch, combining a bizarre mixture of statutory regulation, self-regulation and, in cases, no regulation at incomplete to clean size the statutory elements of the statutory elements of the system is that it can be presented by politicians as being all things to all men, criminal or otherwise. When it had to be sold to the City, during the passage of the Bill, the non-statutory elements of the Government is under pressure to crack down on City scandals, ministers can emphasise the statutory element. How

robust a framework is it?

Financial Services Act, has produced a perculiar hybrid.

At one end of the scale, for example, insider dealing has been a criminal offence since 1980 and looks like becoming more criminal. Some ministers would, one suspects, like to see insider dealers hung, drawn and quartered if they threatened Tory prospects in an election year.

Tobust a framework is it?

My view is that the original draft Bili was relatively tough, but not as tough as it needed to be to cope with the new, winstrall-costs mentality in the markets. But thanks to some intelligent work by the Oppostion and Tory backbenchers, the SIB is a potentially powerful watchdog. It is a private body either the proposition and prosecution.

investigation and prosecution.

The argument about whether election year.

Similarly, the Department of Trade inspectors, who left their visiting cards at Guinness's premises before Christmas, were acting under powers contained in the 1985 Companies whether the SIB can bring to bear the kind of regulatory zeal that characterises the SEC at its best.

For what seems invariably to the hunt. The Takeover Panel is an armchair adjudicator; the Stock Exchange impresses no one with its investigatory fervour; the Department of Trade has been singularly ineffective (and in the Guinness The real oddity, however, is at the heart of the system sketched out in the Financial de the watchdess strain at the do the watchdogs strain at the

The test for the new chairman of the SIB, Sir Kenneth Berrill, is whether he can bring some American-style aggression to the regulation of markets that counter the Schleswig-Hoistein question of modern finance. Is the regulation of markets that the system of regulation set out in the act statutory, self-regulatory or just plain incomprehensible?

To answer the question we need to go back to the beginning of the decade, when the regulators.

THE REAGAN Administration has circled the wagons and from his windowless basement office in the White House, Patrick Joseph Buchanan

is returning fire.

As President Ronald Reagan's director of communications, Mr Buchanan is in the front line of the battle for public opinion on the Iran arms scandal. It is a familiar slot.

Only 13 years ago Mr Government, in one of its more intelligent acts of privatisation, asked an outside legal authority, Professor Jim Gower, to review the trenches wifn another em-Professor Jim Gower, to review the trenches wifh another em-the system of investor protection battled president, Richard

practitioner-based regulation in the City, but to make it subject to surveillance from a government department or agency, \$400,000 a year, and been one as

the Republican right — and left open his options for 1992. "It would have been like Pickett's charge," he says, referring to the final bloody and ultimately futile Confederate effort to win the key Civil War battle of Gettysburg in 1863, "but the support was there." support was there."

What does he make of the present presidential crisis?
What message does he have for those who watch fearfully as the scandal is dissected by congressional committees, the media and the inevitable Grand Jury?

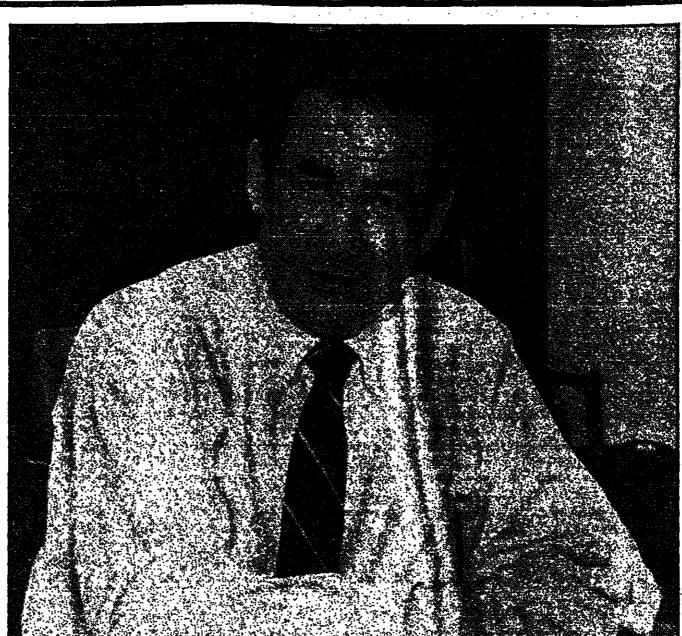

First, a warning: "This is no Watergate," declares Mr Buchanan. He says, in effect, that there is no smoking gun and no cover up of wrongdoing instigated by White House staff which goes right to the top. The President's claim that he knew nothing of the diversion of profits from arms sales to go wrong in Britain is that the authorities lack enthusiasm for Nicerpoint is a credible defence Nicaragua is a credible def in Mr Buchanan's view.

Furthermore, the way the Reagan White House is handling the Iran scandal is very different from the way in which the Nixon presidency treated Water-

"The job of answering charges and allegations about the Iran affair — unlike the Nixon White House where we were all involved in that conwere all involved in that constantly—dues not exist. I don't even read the details of these strange-named people involved in this Iran thing," he says.

Above all, the atmosphere in the US is different, "The Nixon thing really was a fight to the finish."

When the Service Select

INTERVIEW

The Right stuff

Patrick Buchanan, President Reagan's Director

of Communications, talks to Lionel Barber

1973 to the "dirty tricks" aspect of the affair, it was Mr Buchanan's testimony that broke its summer-long momen-

He argued that most of the dirty tricks were standard political fare — and many veteral senators on the committee privately agreed. "It was a real blow-out and an unmitigated disaster," said one. "He made us look like fools." nere is little

Mr Buchanan would dearly like to trade punches over Iran-gate, too. But more sober counsel has prevailed and Mr Reagan, while not offering an outright apology, has made every effort to appear to co-operate with Congress and the three-strong Tower Commission investigating

the working of the National Security Council.

In Mr Buchanan's view there may be legitimate policy debate about the decision to sell arms to Iran. Equally, there is a legitimate probe into whether profits were diverted to the Contra rebels in defiance of a congressional ban. But this should not obscure what Mr finish."

Buchanan—the ideologue—

When the Senate Select views as the core issue: the

Watergate Committee first power struggle between the left

turned its attention in early and right in the US which has

erupted as a result of the current crisis.

In a recent column in the Washington Post (not cleared by the White House chief of staff, Mr Donald Regan), Mr Buchanan wrote: "What liberalism and the left have in mind is the second ruination of the prologue to the 1988 cambrate of deep divisions in American society, going back to the mid-sixtees when the nation was split over liberalism and the left have in mind is the second ruination civil rights and the Vietnam In the event, it led to Mr Goldwater's own Pickett's Charge against President Lyndon Johnson. But the signal had gone out to the conservatives in the Republican Party: they, too, could be contenders. In the longer term, the way had been prepared for the successful

The present struggle—by this definition—is between the conservatives and traditionalists of post-Second World War policided by Mr Ronald Reagan on tical conflict begins with the

mind is the second ruination of a Republican presidency."

led by Mr Ronald Reagan on considering the considering with the conservatives crats, liberals in the bureauctracy, Washington press corps and the academic establishment on the other. "At bottom," Goldwater of Arizona, aided by says Mr Buchanan, "what you conservative activists, wrested are now seeing is a battle for the American political agenda."

been prepared for the successful residential nomination of Ronald Reagan.

Once the White House had been stormed and a two-term had been achieved, one might think the conservatives in the Republican Party should pause for breath. Not a bit, for in Mr Buchanan's words: "The greatest vacuum in American politics is to the right of Ronald Reagan."

By this argument. Mr Reagan stands at the centre of the American political spectrum: a great conservative leader elected by massive popular support who has achieved much in his two terms, particularly support who has achieved much in his two terms, particularly TV stations arguing foreign to restore America's military policy," he says with a mispre-eminence. On the domestic chievous smile. pre-eminence. On the domestic chievous smile.
front, Mr Reagan has left A more likely move is back
chunks of the conservative into television where his inagenda untouched. Key items stant punditry and adversarial

tion of church and state - to hold prayers in schools. Mr Buchanan believes there is ample scope for an ultraconservative Republican to pick up votes from patriotic and nationalistic elements in the

Democratic Party. Allied with the international right from President Botha of South Africa to President Pinochet of Chile, he embodies a virulent anti-communism, a Manichean view of the world where military metaphors are mixed with imagery of god and

Speaking of Dr Martin Luther King, the black civil rights leader, Mr Buchanan once said, urging President Nixon not to visit his widow on the first anniversary of his assassination: "... it would outrage many, many people who believe Dr King was a fraud and perhaps a demagogue . . . others consider him the devil incarnate."

the devil

During the impassioned debate in Congress in 1985 over Mr Reagan's request for Contra sid, Mr Buchanan said: "With aid, Mr Buchanan said: With the vote on Contra aid, the Democrat Party will reveal whether it stands with Ronald Reagan and the Resistance—or Daniel Ortega and the Com-

In the event, a vote the following year restored the flow of weapons to the Contras—a victory which Mr Buchanan counts among his greatest in the current Administration. Therein lies the potency of Pat Buchanan. He has rein-forced the President's own judgments in matters of foreign policy, notably in the unfailing support for anti-Marxist move-ments in Africa, Afghanistan and Central America. That, in turn, has encouraged the President to push, successfully, for his agenda on Capitol Hill.

The question is whether the Iran arms scandal and the new Democrat majority in Congress, have shifted the mood decisively to the President's disadvantage. Mr Buchanan believes the next two years will be difficult but not impossible, pointing out that Richard Nixon won 49 states in 1972 despite Democrat majorities in Congress and the agony of the Vietnam War.

"The President can be an

extraordinarily effective leader in foreign policy, in defence policy, in using the bully pul-pit, in vetoing legislation, in shaping the policy debate, in appointing people to the judi-

ciary.
"This Repulican Party has succeeded to the degree it has because of one man — Ronald Reagan. If the Republican Party feels that it can discard ideas on the basis of its superior fund-raising ability, its superior personalities, and its superior technologies, then we will be back where we were ... and we will belong there."

This, then, is the crusade. This, then, is the crusade.

The question is where best Mr
Buchanan can lead it. Inside
the White House he has constantly felt confined, not least
because of the tight leash of
Mr Donald Regan. It is no
secret that Mr Regan would have been happy to see Mr Buchanan leave the White House to join the Republican campaign. Now he has chosen not to run, his position is, at best, precarious.

He would like to have been offered the job of Nato Ambas-sador, but the State Depart-ment, remembering his bitter attacks over its South Africa policy, vetoed the appointment. "I liked the idea of appearing

Notice of Redemption

Continental Telephone International Finance Corporation 51/2% Guaranteed Convertible Debentures due 1988 CUSIP #212111AA6*

NOTICE IS HEREBY GIVEN that, pursuant to the provisions of the Indenture dated as of March 1, 1968 among Citibank, N.A. (formerly First National City Bank) (the "Trustee") and Continental Telephone International Finance Corporation (the "Indenture"), under which the 5½% Guaranteed Convertible Debentures due 1988 (the "Debentures") were issued, the full current principal amount of Debentures outstanding has been called for redemption on February 27, 1987 (the "Redemption Date") as provided for in the Indenture.

The Debentures specified above will become due and payable on February 27, 1987 at a price of par plus accrued interest to the Redemption Date in the amount of \$54.85 per \$1,000.00 principal amount of the Debentures (the "Redemption Price"). Payment of the Redemption Price and accrued interest will be made upon presentation and surrender of such Debentures, with all unnatured coupons appertaining thereto, at the office of Cabank, N.A., Corporate Trust Services
Department, 111 Wall Street, 5th Floor, New York, NY 10043, or at the main offices of
Citibank, N.A. in Amsterdam, London, Paris, Frankfurt/Main, Milan, or Brussels, or at the office
of Kredietbank S.A. Luxembourgeoise in Luxembourg as the company's Paying Agent.
In accordance with provisions set forth in the Indenture, the Debentures are convertible into

In accordance with provisions set forth in the indenture, the Debentures are convertible into Common Stock of Continental Telephone Corporation (the "Common Stock") at the conversion Price of \$23.71 per share. Accordingly, each \$1,000 Debenture is convertible into 42.18 shares of Common Stock. No fractional shares or scrip representing fractional shares shall be issued upon the conversion of any Debenture or Debentures. In lieu of delivering any fractional interest in a share of Common Stock, resulting from conversion, the Company shall adjust such fractional interest by paying the holder of such surrendered Debenture or Debentures an amount in cash equal to the current market value of such fractional interest (computed on the basis of the last reported sales price regular way of the Common Stock on the New York Stock Exchange prior to the date of conversion). Debentures or portions thereof to be converted are to be surrendered. to the date of conversion). Debentures or portions thereof to be converted are to be surrende to Citibank, N.A., Corporate Trust Services Department, 111 Wall Street, 5th Floor, New York, NY 10043. Debentures may be submitted for conversion, with all unmatured coupons appertaining thereto, until the close of business on the Redemption Date, February 27, 1987, after which the Debentures may not be converted. Please note, no payment or adjustment shall be made upon any conversion in respect of any interest accrued on any Debenture surrendered for conversion or any dividends on the Common Stock delivered upon such conversion.

For Continental Telephone International Finance Corporation

Neither Continental Telephone International Finance Corporation, nor the Trustee shall be responsible for the selection or use of this CUSIP number, nor is any representation made as to its correctness on the Debentures or as indicated in any redemption notice.

NOTICE

Withholding of 20% of gross redemption proceeds may be required by the Interest and Dividend Tax Compliance Act of 1983 unless the Paying Agent has the correct identification number (social security or employer identification number) of the Payee. Please furnish a properly completed Form W-9 or equivalent when presenting your securities.

Writing civil liberties into law tools of incorporation. The cli-mate of opinion has perceptibly to favour the bill. Prompted by

on Friday gives a second reading to a private members bill providing for the in-corporation into English Law of the European Convention on the European Convention on Human Rights, it will neither be handing over political power to the judges, nor will it create ew civil rights.
Its enactment will be logically

and in practice the ultimate step in Britain's commitment to human rights. It will also be a belated recognition that civil liberties need to be spelt out in a written form that will in a written form that will materially assist the courts in protecting the citizen more effectively, without the frustrated individuals having to trundle off to the European Commission on Human Rights at Strasbourg for the enforcement of his rights.

The Convention — framed originally by British lawyers at the Council of Europe in the

late 1940s in the wake of the most devastating assault on human rights by modern civilisation — does no more than declare in the most general terms the fundamental rights and freedom of all civilised democracies. Many English judges freely and freedom fr and freedoms accurately mirror the basic principle of English common law without, of course, the restricting factor of statu-

revenue still comes from mainof personal computers, some as powerful as IBM's biggest machines of a decade ago, has created a huge new market for tenance and operating software. highly profitable businesses which almost trebled in value specialised applications soft-ware. As computers become petween 1980 and 1985 to \$11.5 bn or 23 per cent of its total more commodity-like, manufac-turers are also counting increas-The company says its main

interest in information services tiate their products in the market. is as a means of stimulating hardware sales, which it expects To meet the demand, IBM has to remain its core business for many years. One of its offerings little choice but to turn to small independent software houses. It is Info-Express, which offers direct access to IBM's own comrecently forged an alliance with Hogan Systems, a US leader in puter databases via a special IBM network and has attracted banking software. But lining up further partners may not be easy in a fragmented and highly specialised cottage industry where competing computer com-panies, notably Digital Equip-700 customers.
But IBM has been less success

ment and Hewlett-Packard, have

Two years ago, the UK vetoed a plan by IBM to set up an advanced data network in partnership with British Tele-

com. A proposal by IBM to launch a similar service in France is worrying authori-

ties there, who fear it could

drain revenues away from the

national telecommunications

Industry experts are divided about IBM's longer-

term goals. Some believe the

logic of electronics technology and markets will lead it in-

exerably to extend its presence in telecommunica-

tions. Others think it has

bitten off more than it can

chew.

"IBM is learning a hard lesson," says Ken Philips, vice president for telecommunications policy at Citicorp, the large US bank holding company. "It's not clear where they're going to go or it they are they are to be some and the company.

if they're going to become a

chew.

ful in its efforts to pioneer other services markets. Imnet, a joint venture in electronic financial information with Merrill-Lynch, the largest US brokerage house, was recently scrapped after poor

IBM also plans, along with the CBS broadcasting group and the Sears retailing chain, to launch Trintex, a home videotex service. "Whether Trintex will be successful in the market-place, God alone knows—and he isn't telling us," says Paul Bizzo, IBM's vice chairman. "It's one of those risks that I think we have to take."

The main reason for Imnet's collapse appears not to have been its technology, but a failure to understand intimately enough the workings and needs of its intended market. In its way, it underlined a lesson which IBM is now trying to apply right across its operations. The in use today. There are few challenge, as Goldberg puts it, companies in the world which

IBM has been too busy trying IBM is supplying with an exto sell them hardware in the tensive travel agency manage-

John Akers: instigator of a far-reaching re-appraisal

their businesses. Now the com-pany is going all out to learn, deploying several thousand ex-perts with specialised know-ledge of major industries and Working more closely with large computer users in an effort to anticipate their future needs.

"There's been some improvement in the past year, but they still have a long way to go," says Kailafh Khanna, head of corporate information systems at American Express. Simonds, director of management information systems at chrysler, the US automotive Some in the industry think group, believes IBM faces "a big uphill struggle" to grasp the full complexities of what makes its customers tick.

Nonetheless, IBM holds other strong cards—and is playing them as hard as it can. Though many of its products only offer the performance of a Ford, it is renowned for a Rolls-Royce standard of customer support. Another factor which has helped make IBM the "safe" choice is its proprietary stan-dards, which extend to threequarters of the large computers is to "focus on the customer's set standards. Being on the IBM problem, get inside the customer's head." standard gives us flexibility," says Barry Kofar, a vice presiset standards. Being on the IBM omer's head."

says Barry Kofar, a vice president of United Airlines, which

However, IBM's position as de facto standard-maker is being challenged by customers' growing need to link different makes of computer together. Many computer suppliers and major users, including General Motors and Boeing, have also banded together to support in-dustry-wide "open" standards which could supplant those of IBM. IBM subscribes to the movement but insists that 'open" standards are less versatile than its own and have

IBM will defend to the death its control over standards. Dave Martin, president of National Advanced Systems, a leading US supplier of plug-compatible computers, believes they are a key component in a long-term strategy by IBM to become the world's main supplier of fully-integrated information systems

to large companies.

That scenarios of that kind can give smaller competitors nightmares testifies to the market power which even a troubled IBM still wields. But whatever grand ambitions the company may be harbouring, its first priority for the next few years is likely to be to attend to more pressing problems in its own backyard. The Big Bang in the London Stock Exchange last year focused attention on the extent to which the securities markets depend on technology. The systems now in place are only a first step towards automation in stock dealing. In the next five years profound changes are expected and it is to review the next phase that the Financial Times is arranging a second conference on Technology in the Securities Markets. The meeting will be chaired by Mr Patrick Mitford-Slade, chairman of the Information Services Board. The Stock Exchange, and of the Information Services Board, The Stock Exchange, and Mr Ian Steers, vice-chairman of Wood Gundy Inc. The speakers include Mr Richard Lawson, deputy chairman of The Securities Association; Mr Gordon Pepper, director and The Securius Association, for Gordon Popper, uncour and senior adviser of Midland Montagu: Mr George Rayter, divisional director of Information Services, The International Stock Exchange, Mr Ian McGaw, group managing director of the International Commodities Clearing House Limited; and Mr Michael Baker, divisional director, Settlement Services Division of The Stock Exchange.

Cable Television and Satellite Broadcasting London - February 18 and 19, 1987

Mr Robert Maxwell will be joining the distinguished panel of speakers to give his views on the new media. Mr Marcus Bicknell, commercial director of the Société Européenne des Satellites will speak in the Forum on developments in Europe addressing the question "Sixteen Channels and Medium Power—the Logical Way Ahead?" Mr Ivor Cohen, managing director of Muliard Limited has agreed to speak on the strategies for industry in providing DBS receiving equipment.

Two Topical Conferences: Enterprise, Success and Jobs

London - March 31 and April 29, 1987 The National Economic Development Council, NEDC, has The National Economic Development Country, Nation, has involved the Financial Times to assist in the arrangement of two major conferences designed to interest the whole of the British husiness community. NEDC reaches its 25th birthday this year and the conferences are intended to be a significant

part of the celebrations.

"Company Success" is the title for the first-day event to be held on March 31. The Rt Hon Nigel Lawson, MP, Chancellor of the Exchequer, will open the proceedings and Mr Paul Girolsmi, Mr David Nickson, Mr Alan Clements and Dr Robb

Wilmot are among the contributors.

The Rt Hon Lord Young of Graffham, Secretary of State for Employment, is to open the second conference "People—The Key to Success" on April 29. Mr Bill Jordan is to take the chair and the speakers include Mr Norman Willis, Sir Peter Thompson, Mr Tom Furtado, Mr Peter Wickens and Mr Tony Cill.

The important conferences are to be held at The Queen Elizabeth II Conference Centre and details are available from the Financial Times Conference Organisation.

NOTICE TO THE HOLDERS OF THE OUTSTANDING

SONY CORPORATION (the "Company")

¥20,000,000,000 5.6 per cent. Convertible Bonds 1992 of the Company (the "Bonds")

At the Ordinary General Meeting of Shareholders of the Company ha. . on 30th January, 1987 a resolution was adopted to amend the Company's Articles of Incorporation so as to change the Company's financial year-end from 31st October to 31st March. As a result of the change, the Company will have a five-month financial period running from 1st November, 1995 until 31st March, 1987 and thereafter its financial year will run from 1st April to 31st March in addition, the record dates for the payment by the Company of smutal cash dividends and interim dividends will become 31st March and 30th September, respectively, in each year.

in each year.

To take account of the above change, the Company and The Bank of Tokyo Trust Company (the "Trustee") have entered into a supplemental trust deed amending the Trust Deed dated &th Pebruary. 1982 constituting the Bonda and the Terms and Conditions of the Bonda (the "Conditions"). The supplemental trust deed has, in particular, amended:

(i) the definition of "Dividend Accrual Period" in Condition 4(B)(iii) from "each six month period ending on 30th April or 31st October" to "the five month period ending 31st March. 1987 and thereafter each six month period ending on 31st March or 30th September" and (ii) Condition 4(B)(iii) to provide that any Bondholder who converts his Bonda) or after 1st. April, 1987 and during the month of April or October will receive an amount in respect of accrued interest for the five months ending 31st March or 30th September last preceding the Conversion Date (as defined in Condition 4(B)(ii). Payment of such amount will be made on conversion of such Bond(s) through the Custodian's Agent in Japan to or to the order of such Bondholder.

No amendments have been made in relation to the conversion of Bonds where the

order of such Bondholder.

No amendments have been made in relation to the conversion of Bonds where the Conversion Date falls during the five months ending 30th September or 31st March. Thus, after 31st March, 1987, shares issued upon such conversion will be entitled to the full six-month dividend (if such is paid for the period commencing on 1st April or immediately preceding and ending on such 31st March despite the fact that interest for the full six-month period ending on 30th April or, as the case may be, 31st October, last preceding such 30th September or 31st March is payable on the Bonds so converted.

The foregoing amendments became effective as of 30th Jamary, 1987. Copies of the Trust Deed and the supplemental trust deed are available for inspection at the specified offices of the Paying and Conversion Agents and the principal office of the Trustee listed below.

COMMENTING ON THE RESULTS FOR THE PERIOD. BRUCE TANNER, CHAIRMAN, SAID:

157.58p

Net Assets per Ordinary Share

66 In my report which accompanied the 1935 accounts Leoneluded by outlining our medium term strategy for the development of a strong market position through the restoration of columns and market share. The results of 1986 show the successful implementation of this strategy. Holiday columns have nearly doubled, market share has been increased from 5% to 6% and our trading profit of \$1.6 million offices a Lie 6 million turnsound from 1965.

Total pre-tax profits amounted to L1 6 million, including a profit of L2 9 million arreing from the sale of a part interest in the Orion Hight Simulation Centre The directors propose that the total disulend be maintained at the 1965 level of

I Top per share. The Board believes that there needs to be a further mercuse in trading profits before an increase in dieulend ean be proposed. The final dieulend of 3, 12p per share will be pand on 20th Lebenary, 1987, which is some three months earlier than

The Group's balance short calment 41st October 1986 shoul at a record level of 173 6 million. Net assets per share have increased from 124-63p to 157, 58p. The Group sobolimes short is extremely healthy with good each reserves, low borrowings

and strong fixed assets The sharp and continuing increase in market share since the 1985 low-point gives the Group a marketing momentum which body well. In terms of client satisfaction Horszon is among the leaders of the major operators. The Group will not relent in its pursuit of quality not hast because it is believed that the continuing failure in this respect of certain major competitors can be exploited.

Sound progress in trading profitability will be helped by close control of carts 99 and computer developments, in which Horizon is a front runner.

try by breathing new life into the private sector, gradually reining in government, and broadening trade and investment horizons.

Besides moving into the mainstream of North American business, Quebec is also reconciled
to its place in the fold of Canadian confederation. dian confederation.

It is no longer toying with independence. Instead, Canada's other nine provinces and the Federal Government in Ottawa have joined the Bourassa Government in the Bourassa Government in the search for a mutually acceptable way to let Quebec adhere the end of 1985, may have damaged external confidence in 1987 and 1988. It is no longer toying with

or sign in 1982.

Quebec's new vigour is remarkable because it is the product of events which might have destabilised other societies for many years. As one Montreal lawyer observes, "We have shown that we can deal with the most fundamental problems of society in a democratic and decent way."

Quebeckers have been exposed in the past 25 years to unsettling forces. The intense in the pre-eminence of French, the PQ unsettling forces. The intense contributed to a greater sense of debate over separation from the

In the social sphere, the modernisation of a traditional, largely rural society eroded the role of the Roman Catholle side world and the need to improve productivity and competitiveness.

The PQ government's generally interventionist policies did not preclude its imaginative fears about the future of the French language and identity in North America.

The PQ government's generally interventionist policies did not preclude its imaginative finance minister, Mr Jacques French language and identity in North America.

These traumas for a time cast quebeckers into entrepreneurs a dark shadow over Quebec's and investors.

a dark shadow over Quebec's and investors.

future. In refrospect, they also
laid the foundations for its society which in many ways is revival.

The nationalistic policies of Quebec's real growth rate of 3.7

Quebec

A new climate of self-confidence is evident in Quebec since it shrugged off the independence issue. Its vigour in the mainstream of North American business outstrips the rest of Canada

New force in

to the Canadian constitution, aged external confidence in which former Parti quebecois of Quebec. But the PQ also premier Rene Levesque refused to sign in 1982.

exposed in the past 25 years to unsettling forces. The intense debate over separation from the rest of Canada raised tensions with the Federal Government in Ottawa and heightened business uncertainty.

A rapid growth of government intervention in business during the 1960s and 1970s followed by one of the deepest recessions: this century tested Quebeckers' commitment to a market economy.

In the social sphere, the modernisation of a traditional,

alive and well Quebeckers account for four in every 10 business school graduates in Canada, and francophones are taking their place in growing numbers among the senior man-agers of large Canadian

Almost 250 companies have been listed on the Montreal Stock Exchange in the past two years. While most French-Canadian companies are still dwarfed by their Toronto-based counterparts, they have become increasingly assertive investors in Canada's other nine provinces, in the US and in Europe. Construction in downtown Montreal is booming, as outside confidence in Quebec's future improves. Canadian Imperial

enmissastic than neighbouring

Bourassa wins the middle way

Robert Bourassa in his second term as premier has adopted a policy of not saying much but doing a lot

ROBERT BOURASSA, who defly steered Quebec through a new era of self-confidence, seems a different person from the weak premier whose inex-perience cleared the way for the Parti quebecois victory in 1976. Once insulted by former Canadian prime minister Pierre
Trudean as "a little hot-dog
eater." Mr Bourassa has gained
the respect of most sections of
Quebec society since he began
his second term as premier in
December 1985.

He has provided what one of his ministers calls " a great deal of firmness in the middle of the road." A private sector economist says that the present Bourassa Government has "adopted a policy of not saying much, but doing at lot."

Mr burnessa contrasts 1976 and 1986 by observing that "when you're dealing with your seventh year of power, it's slightly different to your first." He points to the hazards of over-exposure in politics, adding that Quebec voters have always been, reluctant to give their govern-ments more than two terms in

The imposition by Ottawa of the War Measures Act in 1970 reflected Mr Trudeau's impati-ence with the Quebec leader's inability to quash an outbreak of separatist terrorism.

The Bourassa Government was blamed for the financial troubles of the Montreal Olympics, and for a wave of corruption scandals. strengthened their credentials

A lawyer by training (with spells at Oxford and Harvard), Mr Bourassa spent the years between 1976 and his re-election as Quebec Liberal party leader in 1983 studying and teaching in Europe and the US.

surplus Canadian water and hydro-electric power to the US. He returned to Quebec less aloof, but no less determined to regain office.

Mr Bourassa, now aged 53 (though he looks much younger), hides his political ambition behind a mild and friendly manner. He says that he hopes to have at least two terms to deal with the problems of the pro-vince's ageing population, high unemployment and heavy debt burden. "I should like to leave office with a more dynamic eco-nomy, more political stability and more social harmony," he

says. He is generally supportive of efforts to conclude a Canada-US free trade agreement. "It's risky to negotiate with an econo-mic giant," he observes, " but it will be riskier not do it and to face protectionist pressure all the time." One condition is that any accord must include safeguards for vulnerable Quebec industries, notably farming and

While eager to bring Quebec into the 1982 Canadian constitution, Mr Bourassa leaves no doubt that his Government has higher priorities. He says that formal negotiations with Ottawa and the other nine provinces will not start "if we don't have an excellent chance of

succeeding."
He predicts that, whatever happens on the constitutional front, the next election in Quebec will be fought on econo-

tion, education, unemployment and social change are never far from the surface, but perspec-tives have changed. Quebeckers no longer look to their provin-cial government for magical

The 1981-83 recession devastated Quebec's resource and manufacturing economy, and concentrated minds markedly. The PQ Government had to tone down its separatist rhetoric and co-operate with Ottawa to speed

revival.
Robert Bourassa and the Quebec Liberals campaigned for greater government effi-ciency and faster economic recovery. They were voted back in December 1985 with 99 seats in the 122-seat National Assembly. Rene Levesque, in office as premier for eight years, had left and the PQ under his successor Pierre Marc Johnson was hopelessly split on the independence issue. After a year's

But Mr Mulroney has tripped era.
up on several economic issues The Bourassa Government and his popularity has declined wants recognition for Quebec as

Open warfare with the public tion. A first ministers' confersector and construction union, in an economy overheated by the James Bay hydro project quebec's formal adherence, and the 1976 Olympics in Montreal, contributed to Mr Bourassa's downfall in 1976.

At the Federal level, Brian Mulroney's Conservatives won their federal cousins, came 58 out of 75 Quebec seats late in 1984, repeating the John to sign the 1982 Constitution. Diefenbaker landslide nearly 20 Essentially their position has years earlier.

But Mr Mulroney has tripped era.

and his popularity has declined sharply.

A mediocre grassroots of its veto on constitutional organisation has also made it change, more power over difficult for the Tories to immigration, more say in the capitalise on their 1984 victory. Controversy has erupted on reme Court judges, greater taxseveral occasious over the ing powers, and a more favour-personal behaviour and business dealings of Tory caucus members.

According to opinion polls, the Federal Liberals are showing major gains. The New Demo-

honeymoon, Mr Bourassa has crats, traditionally a federalist pulled off a major political coup by getting 300,000 public-sectors first time making a showing in workers to agree to a three-year the province although the increases of just over four per port is difficult to judge.

The ment with contractor employers in free-bargining for the first mines in 10 years.

Open warfare with the public sector and construction union, ence may be held later this year of the provinces are as far as ever from agreeing on any form of "distinctiveness" or special status for Quebec. Progress will not be helped by the reverses in Mr Mulroney's fortunes in Quebec and the rise in popularity of the NDP. The Federal Liberals under John Turner have exploited successfully Conservative gaffes over industrial restructuring in Montreal The Quebec wing of tunes in quepec and the rise in popularity of the NDP. The Federal Liberals under John Turner have exploited suc-cessfully Conservative gaffes over industrial restructuring in Montreal. The Quebec wing of the NDB has been accidental. the NDP has been assiduously courting support by adopting a policy of special status for Quebec—a position which has already brought it into conflict with the more centrist Federal

> The PQ now says that long-term "sovereignty for Quebec" remains fundamental to its plat-form. But a new nationalist group, the Parti independan-tiste, taunts Mr Johnson and calls the PQ "clinically dead." Many of the PQ's stalwarts, such as former Finance Minister Jacques Parizeau and Social

Robert Gibbens

The Economy

A touch of austerity

THE BOURASSA Government is taking advantage of a period of sturdy economic growth to look for ways of correcting the volatility of the Quebec

By adopting a modest auster-ity programme now, the Govern-ment hopes that it will have more elbow room if needed later to stave off another slump on the scale of the 1981-83 reces-

Mr Ghislain Fortin, the finance ministry's economic adviser, says that the aim is to cut the budget deficit from C\$2.9bn in 1986-87 to not much more than C\$2bn within five years. Government spending is due to be pruned by C\$300m in 1987-88.

Pointing out that bankers have raised eyebrows at the rapid increase in Quebec's external debt in the past decade, Mr Fortin says that "we want to avoid at all costs the situation in which the Government would not be able to put the automatic stabilisers into

play (during a recession)."

A variety of programmes has been pruned. Cutbacks in the Quebec stock savings plan, which offers tax breaks to stock market investors, will yield C\$80m a year. Industrial subsidies have been reduced by C\$50m. The authorities plan to withdraw financial support for community television stations. Privatisation of public sector assets has brought in about C\$175m in the current fiscal

Wages make up half of noncapital spending, and the Gov-ernment is especially proud of contracts struck with most of the province's 300,000 public sector workers late last year which will hold their annual increments to an average of 4.1 per cent over the next three years. This means no increase at all in

real terms.

Mr Henri-Paul Rousseau, chief economist at National Bank of Canada in Montreal, says approvingly that the Bourassa Government "has adopted a policy of not saying much, but doing a lot."

His comment needs to be qualified. First, several of the initiatives now bearing fruit—for example, efforts to broaden the tax base and improve relations between public and private sec-tors—were initiated by the pre-vious Parti quebecois gover-Second, the present regime

rates and rising incomes are
reflected in the surge of housing

reflected in the surge of housing starts from 24,000 in the depths of the last recession in 1982 to 58,000 last year.

The Quebec economy as a whole is relatively well balanced compared with that of Canada's other provinces. It is not as heavily dependent on cyclical commodity markets as the western provinces, nor is any single manufacturing sector as important as the automotive industry is to Ontario. On the other hand, Quebec

manufacturing is traditionally heavily oriented towards lowgrowth classic consumer goods such as textiles and shoemaking.

Montreal-based textile indus-try. Montreal's petro-chemical producers, which use oil-based feedstocks, have found difficulty keeping pace with com-panies further west which have access to cheaper natural gas. General Motors has asked for

government aid to ensure the long-term viability of an ageing assembly plant at Ste Therese, north of Montreal.

Quebec's growth rate in 1986 was slightly higher than the esti-mated 3.3 per cent recorded in was slightly higher than the estimated 3.3 per cent recorded in Canada as a whole. Although its performance is expected to remain above the national average, the rate of increase is likely to slow this year and continue at modest levels in 1988. Economists estimate annual real growth in Ouebea's domastic annual real growth in Ouebea's domastic annual real growth in Ouebea. ists estimate annual real growth in Quebec's domestic product at between 2.5 per cent and 3 per cent this year and next.

Future of the province

Waiting for sense of destiny

ship, a business-friendly provin-cial government, and a strong taste for the most radical cultu-ral movements from Europe or the US have not made Quebecois totally indifferent to their churches and traditions. But such traditional institutions are now looked upon, mostly as a heritage worthy of preservation and respect, rather than of commitment and devotion.

deserted, for the time being at least, the only French "state" in

North America.

There are those who say that pronounced individualism is a short-term reaction to the overshort-term reaction to the over-dose of obsessive political debates of the 1970s, which led to the narrow defeat by a referendum in 1980 of the nationalist proposal for a form of "sovereignty-association" with the rest of Canada.

Some historians and political scientists regularly remind us that nationalism is deeply rooted in the French-Canadian psyche, and goes through end-less high and low tides. Quebecois will be seized again by a sense of destiny, they assume, and will go through another cycle of collective assertion against the assimilating forces surrounding them on an Engl-

ish-speaking continent.
Though it is true that waves of nationalism have periodically rallied a large part of the population since the Patriot Rebellion of 1837, the Quebec of 1987 cannot count any longer on the homogeneity which was an essential feature of such past

until the mid-1970s, Quebec's:
Until the mid-1970s, Quebec's:
elites shared common values,
were of the same class: that of
the clergy and the professions
until 1960, followed by the intellectuals and the technocrats of the Quiet Revoluton. But the 1980s are witnessing a profound and enduring clash between the values of a "double élite." the new dynamic business class, and the still powerful triangle of unions, academia and civil service which shaped Quebec

into what it is. The 50:50 split among Frenchspeaking voters in the May 1980 referendum roughly maps the respective influence of these two groups. Both care for the future of Quebec; it is unlikely. however, that their divergent interests will ever be bridged in any kind of political common

purpose. Demography has taken care of ethnic homogeneity. The Mon-treal area, with almost half of the province's population, is a lively mix of 65 per cent Frenchspeaking people, 11 per cent City.

THE LOWEST birth rate on the Continent, an eager admiration from various ethnic backfor any kind of entrepreneurship, a business-friendly provin-learn English as their second language but are now often tur-ning to French.

Even if they were finally to integrate or to assimilate into the French majority, these newcomers and their descendants cannot be expected to share the same sense of history. much less to engage in traditional quebecois battles. And Any kind of collective faith or sense of mission seems to have growing in the province.

> If the revival of strong political nationalism, and thus of a large autonomist or even inde-pendentist movement is unlikely, will Quebec and its new values quietly sink into the Canadian ensemble, under the comfortable umbrella?

Despite the 1980 referendum results, no lasting agreement has emerged between Quebec and the rest of Canada. The 1982 Canadian constitution was agreed between the federal gov-ernment and the nine other proernment and the nine other pro-vinces, against the unanimous will of all parties in Quebec's provincial legislature. Since then, despite some federal repentance and promises of seeking a "new deal" with Quebec, the rest of Canada has been reluctant, to say the least, to come to any meaningful com-promise with the dissident pro-vince.

Indifference has settled in on both sides. So that if the separatist movement has faded, it has certainly not been replaced by an accrued sense of belonging to Canada.

The new French-speaking entrepreneurs want to expand out of domestic Quebec mar-kets. Many show more interest in free trade with the US than do their colleagues in English

Such a movement is not with-out its risks. There may be a naive tendency to think that America is less hostile to the peculiarity of Quebec than is English Canada. But the phenomenon may be an unconscious way to keep Quebec's distance from the rest of Canada, to compensate the political defeat of nationalism in 1982 by a subtle shifting of focus, giving Quebec a North American option on its own

The boom in museums

the Lila Acheson Wallace tive art.
Wing for Twentieth Century This new wing, with Art at the Metropolitan 60,000 sq ft of exhibition space, Museum. Inch by inch and yard is larger than the Guggenheim by yard the Metropolitan eats and the Whitney and about twoway into Central Park, spreading the sea of culture further and further beyond the street. The floor plan that is given you—in fact you need a street-finder-is already out of

The growth of existing museums and the building of completely new ones is a seem-ingly endless American saga. Museums are the building type of the last quarter of the century, almost as though we want to feel, because the future is so unpredictable, that at least the best of the past is secure. It was in 1970 that Kevin Roche of the American firm Kevin Roche, John Dinkeloo and Associates began alterations and additions to the museum and drew up a Master Plan which is still being slavishly followed. While it makes

... a seemingly endless

American saga' perfect sense to plan the growth and expansion of a museum in a logical way, in architectural terms the continuing employ-ment of Kevin Roche has added little to the glory of the

Metropolitan Museum. I asked the director of the Metropolitan Philippe de Montebello, to explain the architectural approach. tectural approach; he pointed out that the museum likes an architect "who knows where the leaks are" and that at the "Met" they have a distinct preference for architectural

ture of the museum.

Architecturally the Metropolitan Museum has interesting origins. The first building, by Calvert Vaux and Jacob Wrey Mould, was completed in 1880 and was in a very agreeable red and white Ruskinian Gothic red and white Ruskinian Gothic convincing display of his street in Milan.

style. You gan still glimpse it doubted talent. Here is a case
through the Lehman Wing of an artist being given much the contemporary equivalent of the museum is the Fifth Avenue
façade which is by Richard new wing at the Metropolitan here is a case
The museum is the Fifth Avenue
façade which is by Richard new wing at the Metropolitan here is a case
through the Lehman Wing.

The styleless nature of the are the secular equivalents of the Victorian benefactions to the churches for the donors too.

It will soon be possible to write the entire history of the modern that the contemporary equivalent of the victorian benefactions to the churches for the donors too.

It will soon be possible to write the entire history of the modern that the contemporary equivalent of the victorian benefactions to the churches for the donors too. four years later. It was kevin Guggenheim and doubte the line instory of the indeering Roche who added the grand, size of the Marcel Breuer architecture of the last few great stair to the front of this Whitney Museum, with an decades entirely in terms of Beaux Arts façade. This is one extension by Michael Graves, museums—they are the last of the livelier sights on Fifth suggest a loss of direction in opportunity for the grand gestavenue on any sunny day; the New York. The proposals by ture, an association of the art Avenue on any sunny day; the rather austere flanking fountains, also by Roche, are very

appropriate. Today you walk through the Kevin Roche revamped great hall, which has something of the air of a department store with excellent but rather brassy museum shops. Four great urns—the "continuing gift of Lila Acheson Wallace" filled with floodlit flowers are further reminders of the generosity of the late Readers

Digest millionaire. Whatever architectural reservations there may be about the bland growths that sprout so regularly from the old body of the Metropolitan, the opening of the 20th-century art collection is a major event. It cost some \$26m. It is four storeys tion is a major event. It cost some \$26m. It is four storeys high rising over the underground car park at the south-

thirds the size of the Museum of Modern Art in the same city. There are some 22 galleries on three levels. The only space that has any sense of architectural drama is the 30 ft high sculpture court dramatically lit by a sloping skylight. In a harsh snowy light, when I saw this space, it was decidedly glaring, the light killing the paintings hung immediately beneath the windows. It is the 20 ft high ceilings that enhance the new galleries, devoted to contemporary paintings and give the place a pleasant feeling of the place and pleasa

ing of an uptown loft. Certainly the large scale of many of the galleries is an many of the galleries is an improvement on the small scale white rooms of much of MOMA's recent expansion. The planning of the new rooms definitely suits the more recent works that hang there. You tend to meander around them, a trifle uncertainty. You are trifle uncertainty. You are considered to the statement of the original Beaux Arts interiors. given neither architectural nor artistic directions.

portant Alfred Steiglitz collec-tion of works by American artists that he collected himself were given to the museum in 1949 by his widow, the artist Georgia O'Keefe. On the earlier level there is also the museum's show of some of its design and architecture collection.

This is rather a curious in-stallation of furniture and ob-"Met" they have a distinct preference for architectural neutrality.

It is quite difficult to see the difference between the various benefactions — Lila Acheson Wallace looks much like Sackler and Robert Lehman and they all look much like he American Wing. Gone are the days when there was an element of cultural didacticism about the architecture of the museum.

Architecturally the Metropolitan Museum has interesting stallation of furniture and objects that are arranged in a way that offers the visitor some extraordinary juxtapositions. Vienna of 1900 meets the modern movement Art Deco sits strangely on its stone platform. Small scale galleries hold the Berggruen collection of work by Paul Klee and a collection of modern photographs.

The one mildiy controversial exhibit is the installation of furniture and objects that are arranged in a way that offers the visitor some extraordinary juxtapositions. Vienna of 1900 meets the modern movement Art Deco sits strangely on its stone platform. Small scale galleries hold the Berggruen collection of modern photographs.

visual autobiography, Quarter has also recently been commissioned to build galleries for flattened shirts and piles of old hardback books arranged as has won a remarkable commissioned to build galleries for flattened shirts and piles of old hardback books arranged as has won a remarkable commissioned to build galleries for flattened to build galleries flattened to build galleries flattened to build galleries flattened to buil three columns do not make a sion to expand the venerable convincing display of his undoubted talent. Here is a case

For architects, museums are

Gwathmey Siegel to add on to of the present and the past-the already perfect Frank It is an association where both Lloyd Wright Guggenheim are sides definitely benefit.

Tomorrow sees the public west corner of the museum to being fiercely fought in New opening of the latest new the rear of the Michael C. York. They do not deserve to museum addition in New York Rockefeller galleries of primitive than The Achael Waller and the Achae to the architectural indulgence that wants to spoil one masterpiece for the dubious distinction of endlessly housing collections that put growth

before discrimination. The same argument applies to the expansion of the Whitney Museum of American Art. Michael Graves came up with a proposal that ingeniously embraced the concrete walls of the Breuer building in the arms of Post Modernism. So over-powering were the advances of Graves that the original building became a mere corner of a new temple in his own version of an Aztec monument.

More interesting but again wildly expansionist are the winning proposals for the new wing to be added to the Brooklyn Museum, designed by Arata Isosaki working with the New York architect Janes Polschek. Botanic Gardens and even proposes the removal of some of the alterations of the 1930s to restore the totality of the original Beaux Arts interiors.

When will the museum boom end? In many ware it looks

given neither architectural nor artistic directions.

In the earlier galleries there is more of a sense of order. The Sharp Gallery offers a short but stimulating introduction to the cross currents of 20th-century art. Bonnard and the Impressionists share space with a survey of American paintiting that starts in 1905. The important Alfred Steiglitz collectives white constructions that he has already built (for that he has already built (for museums, of course) in Atlanta and Frankfurt? Rumour has it that he is responding to the Hollywood hills in a way that may produce some surprises. Here in England the Tate Gallery will in April open its new Clore Galleries for the Turner Collection. They are designed by Jamer Stirling who

School for Wives/Lyttelton

Martin Hoyle

Di Travis has been praised for her direction of small-scale and touring theatre with both our national companies. Michael Coveney in these pages has lauded her work with The Mother for the NT education department and her lack of a major production at the National or the RSC has long been adduced as an example of the neglect suffered by women directors in a (theatrical) man's world.

Merit has been rewarded with a baroque comedy in the un-yielding Lyttelton auditorium (some rewardl); and, as if to shw us just what she can do, Miss Travis proceeds to make thing hard for herself with a perverity that borders on genius.

Molière's opening scene presents us with one of his un-balanced obsessives talking to one of those humane, wordly-wise cynics who are so often the mouthpiece of reason. Sure enough, we see David Ryall doing us all a service with his low-key, naturalistic throwaway delivery of the laboured rhyming (and creaking) alexandrines of Robert David MacDonald's new translation. We also see that master of

dottiness, Roger Lloyd Pack, sheets. The decidedly un-comic Unfortunately he represents the norm while Mr Ryall embodies the fanatic. Mr Lloyd Pack is utterly at sea, wretchedly miscast and misdirected, so that his effortful piping of lines like "Marry a ninny, then?" sound footlingly fatuous.

An uncertainty as to whether to laugh with the play or at it leaves much of the characterisa-tion blank. As the c onventreared innocent kept in jealous seclusion by her guardian, Julia Ford shows a fine comic touch when harangued on wifely duties by the Petruchiolike Arnolphe. Her climactic realisation of her own shameful ignorance however is neither ignorance, however, is neither touching nor rebellious; merely the whine of a flustered super-

market cashler.

The evening's most dramatic moment is the very opening when Gerry Jenkinson's lighting illuminates a stage of frozen figures, a whole society in a stricken world. Straw bales on the cobbled slope of Pamela Howard's set add a rustic air; rudimentary crosses recede over the hill. A star-twinkling background of mudged blue depicts the Leo and Virgo from some medieval zodiac.

Arnolphe's house boasts pulmarket cashier.

quivering neurosis, repressed Arnolphe's house boasts pul-directorial uninspirate angst, hysteria and incipient leys, painters' cradles, canvas seen for some time.

servants are grubby farm workers whose coitus interrup-tus (inspired by their master's words, "Your love must be displayed"?) mark one of the production's more desperate moments. The faintly agricultural air-is Arnolphe an oldfashioned country squire? — makes nonsense of the references to the city and its

heartless society ready to mock the cuckold. The sheltered Agnes, barefoot and hair dishevelled, comes on in a shift like Ophelia, and is remarkably bucolic for the product of a 17th century convent.

David Ryall, an NT stalwart, struggles with a production that makes this comedy dull, un-varied and rudderless. In a reversal of Moliere's intentions. he often seems the one normal character on stage. His intimate style and quiet ferocity when, teeth gritted, h edrawls with ferocious trgency through his nose, make up for the lack of a naturally light comic touch. He displays glimmers of integrity throughout a slightly bizarre and, one feels, bewildered evening, whose final manifestation of the Madonna, her hand upraised in blessing, is the most grotes nedieval zodiac. quely misplaced piece of Arnolphe's house boasts pul-directorial uninspiration I have

weeks is not entirely clear. The concept is attractively straightforward: take six of Stravinsky's most celebrated works, combine them with pieces written in the same years, and surround the concerto with a package of exhibitions, lectures and lunch-

time and foyer events.
Thus for Thursday's opening concert Elgar's Violin Concerto was programmed with The Fire-bird ballet, both written in 1910; Sunday's concert brings an encounter between Petrushku (1911), Prokoflev's First Piano Concerto and Ravel's Daphnis and Chloe, then Debussy's Images is paired with The Rite of Spring, and so on. In some cases the selections do give a sense of Stravinsky's radicalism, in others the ways in which he exchanged inflences with his contemporaries. But towards the end of the series in parti-

zar's Feast. It's significant, too, that the

survey stops at 1945, with Stravinsky at the height of his neoclassical powers; there is no sample of the late serial works or an attempt to show how at the end of his career he did come to terms (albeit his own terms) with the strand of 20thcentury modernism that had run in parallel with his own career for more than half a century. Yet any scheme, whether worked out completely or not, can be justified if it provides the basis for highquality music-making. The success of Stravinsky Plus will lie much more in the excellence of the performances than in its musicological or historical usefulness.

First impressions were only partially convincing. The festival was launched most uncer-

appears each Friday.

lack of assurance transmitted itself to the orchestra, which played without conviction or rounded tone, and obtained little encouragement from Rozhdestvensky.

Much of The Firebird was several orders of magnitude more accomplished; at least it gave the sense of having been rehearced with some thorough ness. It did not quite convince one, however, that Rozhdest vensky has a reason for con-ducting the complete score rather than the suite; the well known set pieces emerged the most vividly, and the section from the Infernal Dance to the close produced the boldest playing of the evening. Elsewhere transitions and minor scenes were only roughly sketched, and without consistent pin-point accuracy the work can seem unwontedly long-winded.

Carnegie Hall: Guarneri Quartet/Kalichstein/Laredo/Robinson Trio. A programme of quartets by Haydn, Beethoven, Schoenberg, Brahms (Tue); Ivo Pogorelich plano recital. Mixed programme (Wed); Jessye Norman soprano recital. Mixed pro-gramme (Thur). (247 7800).

A Wholly Healthy Glasgow

Martin Hoyle

The Mobil Playwriting Com- sharply characterised in the petition has struck oil again. writing; each has his own Iain Heggie's comedy took a rhythms and verbal trade special prize in 1985 and has marks. The boy ends every now prompted some audience query with an automatic outrage in Richard Wilson's "sorry." Charley audibly production at Manchester's indents each spoken paragraph Royal Exchange. Mr Heggie's with a jabbing vocal "and" (even when following it with common explosives heightened "but"). Dick played by Tom dialogue bristles with casual if (even when following it with common expletives, heightened "but"). Dick, played by Tom and honed into an elliptical, Watson with the beady-eyed demotic Scots equivalent of balefulness of an epicene David Mamet, a writer whose turtle, is just obscene—when influence he acknowledges. A Glaswegian quirkiness and — London ("Ah had a chandelier dare one say?—wholly British in ma kitchenette") and the feeling for language make this Earl's Court Road where "you a funny as well as a rude play; get your nooky every and signal the arrival of a seconds."

not threatening to return to

a funny as well as a rude play; and signal the arrival of a highly individual new voice.

Smooth operator Charley and seedy masseur Dick have a good thing going at the Spartan Health Club, respectively hardselling subscriptions and indulging in dubious après-massage therapy. This agreeable modus vivendi is jeopardised by a new instructor, an earnest idealist ("Eighteenyears-old and totally not into the acquisition of wealth," it is noted with incredulous disgust) who aims for "a wholly healthy Glasgow" by 1990; "a city of perfectly proportioned, sinuous but not over-developed physiques... non-smoking, non-drinking joggers ... A city of plane-loads of eager Euronest ideals that the machinations of the sabotage this threat to all they hold dear.

Each member of the trio is spots of the signal of the trio is seconds."

As young Murdo, Paul Higgins throbs with crusading zeal and refers to bis enthusiasm in tones of lugubrious solemnity, taking on the pathetic vulnerability of the hurt puppy while almost visibly wising up. Gerard Kelly's super-salesman is magnificent. He has the most lines in a conversation-piece that is perhaps 10 minutes too least fascinating aspect of the playable roles; what a good TV piece it would make. Not the least fascinating aspect of the playable roles; what a good TV piece it would make. Not the least fascinating aspect of the playable roles; what a good TV piece it would make. Not the least fascinating aspect of the playable roles; what a good TV piece it would make. Not the least fascinating aspect of the playable roles; what a good TV piece it would make. Not the least fascinating aspect of the playable roles; what a good TV piece it would in the machinations of the saccination as the proposition of the saccination as the proposition of the

March of the Falsettos

Martin Hoyle

Northward look, the theatrical sky is bright. Not only was Edinburgh's corner in Molière confirmed last week by the NT's thumpingly wrong-headed School for Wives (most tolerated, it seems, by those who know the play least), but once again Manchester's Library Theatre has emerged as Europe's trail-blazer in superbly slick presentation of intelligent Against Chris Kinsman's set

-Seberg doesn't count.) William Finn's off-Broadway March of the Falsettos (1981) has become something of a cult. The 75-minute centrepiece of a projected triptych, this durch-

Stravinsky Plus/Barbican Hall

Stravinsky Plus/Barbican Hall

Andrew Clements

Exactly what Gennadi Rozhdestvensky is setting out to demonstrate in the juxtapositions of the Stravinsky Plus

Festival he is conducting with the London Symphony Orchestra at the Barbican over the three weeks is not entirely clear. The stravinsky Plus been pitted against Schoenberg barby pale shadow of that, and her who likes was a very pale shadow of that, and her who likes wis a very pale shadow of that, and her who likes is conducting with the London Symphony Orchestra at the Barbican over the three weeks is not entirely clear. The who likes wis na Room Bitching," sets the tone. Marvin has left his wife for a younger partner who likes sex, mone yand (preferably French) chic. The archety and effective poule de luxe, in fact; except that this poule is a coq. Marvin has shacked up with another man, and "My father's a bome "sings Damien Walker, astonishingly assured at 12 years old, as son Jason. (Did tappears with Belsharlack of assurance transmitted to this?)

Woody Allen without glibness, Neil Simon with guts.

The opening number, "Four Jews in a Room Bitching," sets the tone. Marvin has left his wife for a younger partner who likes sex, money and (preferably French) chic. The archety and programmes seems to present the top over which one must not go.

Simon Lowe leads six sxcellent musicians in what amounts to a tribute to Howard Lloydastonishingly assured at 12 years old, as son Jason. (Did Italia Conti dream it would come to this?)

The pleasure never flags. Against Chris Kinsman's set slick presentation of intelligent Against Chris Kinsman's set American musicals. (Sorry, NT (giant Venetian blinds, silvery) and reflecting, a door-frame, mobile exec furniture) Roger Haines directs a polished cast. Simon Green (more a minor public schoolboy with major weaknesses than a pretty komponiert set of variations on predator on the make in NY) articulate, wry, self-probing and Martin Smith, whose New York Jewish angst comes Marvin has a fleeting look of over as Sondheim with tunes. Gene Kelly, convince in both Gene Kelly, convince in both Woody Allen without glibness, attraction and exasperation.
Neil Simon with guts. Paddy Navin's generously per-

come to this?)

The piece lightly but never superficially probes the characters' feelings—guilt, good intentions, agonised fairness ("Daddy's sincere but a Overtures and Follies, either of schmoe," sings deserted Trina to their son); Marvin's desire for wife, child and lover to be rumoured to be London-bound. Ironically, this company's triumphs, in its satellite theatre at Wythenshawe, included Lloyd-Lewis's productions of Sondhelm's Pacific Overtures and Follies, either of which devoted enterprises would have been an ornament to the West End.

Frozen Assets/Half Moon

Claire Armitstead

on to the RSC. Its reappear-ance at the Half Moon, appro-priately close to the still-beat-ing heart of Keeffe's native East mark but it it is hard to believe End, reveals a play that has some is expected of take it somehow resisted valiant attempts to bring it forward into Thatcher's Britain (and Liberal-controlled, yuppyised Tower Hamlets).

Case for Iran arms embargo

of one's time not thinking about the Iran-Iraq war. For public of martyrdom, can better affor opinion outside the Islamic to pay than her opponent. world there is very little to choose in terms of attractiveness, or of the opposite, between the two regimes locked in mortal combat. Dr Henry Kissinger spoke for many when he said, early on in the conflict, that it was a pity both sides could not lose.

It is easy, therefore, to turn one's mind elsewhere and to shrug off the appalling human cost of a war which has already taken et least half a million lives—quite possibly a million.
Especially easy, though no more honourable, if one happens to share neither the religion nor the culture, nor yet the skin colour, of the unfortunate combatants and victims. The very duration of the war, which should add to the horror, helps to dull the sensibilities of those not directly involved. What is there new to say about it? What point is there in saying anything, when whatever one says makes not the slightest

Iraq's plight

Even a new Iranian offensive sales is now understood by arouses little interest at first, almost everyone in Washington. having become a more or less. The time is surely ripe for a regular seasonal event. A flurry new international effort to block of apprehension, perhaps, at the further arms supplies to Iran, suggestion that Basra might fall, unless or until Iran agrees to followed by a quick sigh of a ceasefire on reasonable terms. relief when American satellite There seems no reason why the intelligence reports that the city's main defences are still Now, however, reports from the Iranian side of the front make it clear that Iraq's plight is more serious than it at first seemed.

Iranian morale, both at the front and behind it, is high. Iran is stil exporting 1.7m to 1.8m barrels of oil per day— which gives her enough foreign exchange to pay for the weapons and other essential supplies she needs to keep the war going. This offensive may not, after all, be Iran's last desperate throw. It may be just one more turn of the screw that is slowly turn of the screw that is slowly to sit paralysed like a rabbit choking Iraq to death. The front moves only a few miles at a time, and at great human revolution grind slowly on.

IT IS very easy, if one has the cost. But it moves always in the good fortune to live a long way same direction; and the cost is from the Gulf, to spend most one that Iran, with her much larger population and her cult of martyrdom, can better afford

Sooner or later, if things go on this way, Iraq is going to crack, and Iran is going to win.
What exactly that will mean for
the region cannot be predicted.
But it will certainly be bad for the West, and for pro-Western Arab regimes.

Iraq started the war, and is paying dearly for it. But it is only Iran that now insists on continuing it, refusing any peace terms that do not include the overthrow of the Iraqi regime. And Iran, fiercely independent though its leaders are, could not continue fighting as it does without finding foreign customers for its oil (in what ought to be a buyer's market), and above all without finding foreign arms suppliers willing to take Iranian money. Reports from Tehran now suggest that weapons and spare parts supplied by the US may have played a major role in Iran's latest advance.

The utter folly of those arms Soviet Union should not co-operate in enforcing such an embargo, since Moscow is more heavily committed than the West to ensuring Iraq's sur-vival, and is anxious to improve its relations with the Arab world at large. There are even signs that a chastened Syria may be willing to rejoin the Arab fold, now that Iranian troops are clearly occupying Arab territory. troops are cle Arab territory.

An international embargo on arms deliveries to Iran would neither be certain of success nor free from risks. But to attempt it is surely better than

The US takes aim at Airbus

NO SOONER have the US and sions-the EEC averted a threatened which trade war over American grain sales than Washington seems to be gunning for a fresh transatlantic dispute. The target is the European Airbus programme, which is to be discussed by a US delegation in visits to London, Paris and Bonn this week.

American complaints about It is far from certain that the allegedly excessive government \$2.5bn in launch aid for the subsidies for Airbus go back A340 project and its planned American complaints about subsidies for Airbus go back a long way. Last year alone, with the Europeans which led to uneasy compromises. Now. against a background of muffled retaliation threats, the US is saying that more concessions are needed to bring European practice into line with the spirit of the General Agreement on Tariffs and Trade.

Accusations denied

The timing of the US move appears to be influenced at least partly by lobbying by McDonnell Douglas, which is worried that its newly-launched MD-11 long-haul airliner will face stiff price competition from the A340 which Airbus wants to build. There have been US accusations, hotly denied by the Europeans, that Airbus is already offering A340s to MD-11 customers at uneconomically low prices.

It is not yet clear how far the US aim is to warn Airbus off the long-haul airliner market and how far it is to seek a more comprehensive "clarification" of the application of the Gatt code, Either way, bilateral armtwisting of individual European governments, popular as it may be at home, seems unlikely to be a very productive tactic.

If the US really wants to tighten up the rules of inter-national competition in the lic purse will not be easy. But national competition in the lic purse will not be easy. But industry, it should properly take the impressive number of interup the issue with the EEC in national orders won by its new Gatt. There is much to be said A320 aircraft shows that it car for such an initiative, since the carve out a worthwhile niche ir existing Gatt code on subsidies a fiercely competitive world to commercial aircraft production is exceedingly waget. tion is exceedingly vague.

However, such an approach would be unlikely to yield the argumquick results which the US sidies. apparently wants. Government support for the civil aircraft industry is a murky area. Any new agreement would have to new agreement would have to do more harm than good. This take into account not only is not the moment for Wash-airbus subsidies but also the role of defence spending, export simply to appease domestic credits and special tax conces- interests.

-all advantages from which US manufacturers benefit.

It is, in any case, arguable that Washington may be turning up the heat at precisely the wrong moment. For other events are already obliging Airbus' backers to adopt a harderheaded commercial attitude towards the future of the pro-

A330 stablemate will be forth coming. The A340, in particular looks an increasingly risky gamble on unproven technology which, at best, will not go or sale until two years after MD-11

The economics of Airbu: have been further clouded by the continued sharp fall of the dollar. This is obviously of particular concern in Bonn and is likely to strengthen criticism of Airbus subsidies by the Frec Democrats, who substantially increased their share of the vote

at last month's elections. The West German Govern ment has been seeking admittedly with little success so far, to persuade privat, industry to shoulder a bigge: financial stake in Airbus. It the UK, privatisation of Britis Aerospace has already distance the Government from direct involvement in the programm

THE PHILIPPINES CONSTITUTIONAL REFERENDUM

Cory takes the people's test

By Richard Gourlay in Manila and Robin Pauley in London

unfold after another, today face their most important day since Mrs Cory Aquino replaced Ferdinand Marcos as President. Today Mrs Aquino is taking a long and complex new constitution to the people in a referendum. They are required to vote "Yes" or "No" on the entire document. A "Yes" vote is critical to Mrs Aquino's

desire for political and social stability, as well as being an important vote of personal confidence—a vote confused, some critics say, with constitutional issues which might have been better left to the legis-

The one plain clause is that which will confirm Mrs Agumo and her Vice-President in office, without election until June 30 1992. This is a controver-sial move for a President trying sall move for a President trying to restore democracy to a country previously ruled by martial law and dictatorship for Mrs Aquino was never elected President—rather, she was installed in office after a civilian-backed military revolt deposed Mr Marcos last February

The army action followed what were widely perceived as rigged presidential elections which had returned Mr Marcos to power. According to the official, tainted results, Mrs Aquino had lost.

Today's referendum is essentially a nationwide opinion poll for Mrs Aquino, the widow of one of President Marcos's staunchest political opponents who was assassinated at Manila Airport on his return from exile in 1983. Time magazine's Woman of the Year, she rules one of the most complex and divided republics in the world, with 55m people spread across 7,000 separate islands.

It was clear from the moment Mrs Aquino was sworn in 11 months ago that she could never meet the hopes that were vested in her. That said, no one predicted the intensity of the political onslaught she faced within works of the political onslaught of the said. weeks of entering the Mala-canang Palace.

She has had to juggle the demands of right-wing Marcos loyalists in the north, Com-munist leaders of a 17-year insurgency in the south, rival Moslem groups and a divided army which has plotted or attempted a coup d'etat on

This turbulence would be daunting for a seasoned political warior. But for a fledgling cutting her teeth on the job, it must at times seem insurmount-able—particularly to someone who professes to be a reluctant President and who says she is not enjoying the position. She, no less than either her supporters or foreign observers, must sometimes find it remarkable that she is still there at all. Like a magic candle that will not blow out, she has

THE PHILIPPINES people, appeared lost in the darkness who seem to spend their of one crisis after another, only lives watching one crisis d after another, today face merely by the process of having

> Today's vote will provide the best indication yet of how the Philippine people assess Mrs Aquino's record. Her key achievement to date has been her success in outmanoeuvring military dissidents.

> On November 23 last year she sacked Mr Juan Ponce Enrile, the Defence Minister and the man responsible, with General Fidel Ramos, Chief of Staff, for the switch of army support from Marcos to Aquino in Rebruser.

This was a high risk strategy.

It gave Enrile—who opposed Mrs Aquino, and was allegedly involved in plots against her, partly because of her determination to compromise with the Communists—the freedom to lead an openly hostile campaign against her. He is today urging a "no" vote in the referendum.

But it enhanced her authority

But it enhanced her authority and helped bring about a ceasefire with the Communists. The ceasefire is still in force, but the rebel leaders have broken off peace talks with the Government because of the shooting of left-wing demonshould or lett-wing demonstrators by paramilitary police in Manila 10 days ago, and because they felt the Government was not negotiating in good

It proved one of Mrs Aquino's worst weeks yet. The most serious right-wing coup attempt so far was mounted and although it failed, it raised important questions about con-tinuing divisions in the army. In the same week her fragile bridges with the Communists and Moslem rebels seemed to be crumbling.

"The Government is buffeted from left and from right," complains a key presidential aide Mr Joker Arroyo. All sides detected an advantage from undermining Mrs Aquino and perhaps getting today's refer-endum postponed or cancelled.

Mrs Aquino has some important successes to her credit. Probably the most striking is a marked change in the tone of government. Both at home and abroad, the Philippines is now no longer seen as debilitated by the rampant cor-ruption which characterised the Marcos years.

Mr Jaime Ongpin, the Finance Minister, still describes the public works and highways ministry as a "snake pit of Catholic leader, Jaime Cardinal Sin has warned against the return of graft among senior officials. There is clearly a lot more cleaning up to do, but Mrs Aquino's integrity on this score is not in doubt and the improvement is beyond question.

The lessening of corruption has also helped Mrs Aquino regain for her country the

unequivocal backing of the US. Leaked tape recordings of some than Mr Marcos's and it is an Washington's key concern is the two US bases in the Philippines, critical for regional security. The fact that Mrs Aquino remains ambivalent in her atti-tude to the bases—she has given no commitment either to close or maintain them beyond 1991 when their leases expire—does not seem to have discouraged the US Administration, which is relieved at no longer being seen to be in harness with an

Likewise, respect for Mrs Aquino has also brought help from the international financial community — banks have recently agreed to reschedule the country's substantial official

This is not to say Mrs Aquino is without blemish. She has closed a newspaper critical of government policy, a move more akin to the style of her predecessor than to the image she has been trying to promote.

of her conversations also sug-gested a willingness to meddle with the constitution to her own advantage.

More important to most Filipinos than any of these things Mrs Aquino failed to move on the key issue of land reform, sparking demonstra-tions by peasant farmers, such as the one in which 15 were shot dead near the presidential palace last month.

About 90 per cent of land is owned by 10 per cent of Filipinos, many of whom act as almost feudal landlords. Most shown no sign of wanting to break up any of the large estates owned by her own family.

In the words of one left-wing activist: 'Our best access point for politicisation (of peasants) is when there are land probis when there are land probnot turn round the problems the past year's experience, it is

area which she will have to tackle if she is to achieve the

been slow to implement an economic programme that would provide the 16,000 to 23,000 insurgents from various 23,000 insurgents from various groups with a real alternative to staying holed up in the hills. There is no doubt that many would give up the struggle if they were offered the possibility of making a decent living. In the hills north of Davao, for example, gold has been discovered prompting graps rebels. covered, prompting some rebels to throw down their arms and

take up gold pens, giving both temporary peace and a muchneeded boost to the local economy. But, even if Mrs Aquino were

the saint many of her sup-porters think she is, she could

nised and, given her personal courage and popularity, she seems likely to command the two thirds "Yes" vote she wants when votes are counted during the next week.

She has criss-crossed the country campaigning for sup-port, Mrs Edith Gonzales, a poor mother of six children in Davao City, sums up the feelings of many rural peasants --disappointed though they may be that their lot is not greatly improved: "After 20 years of Marcos we should give Cory a

If the vote is "No," or close to it, Mrs Aquino is not expected to resign. But she will face further uncertainty, instability and clamour from the opposition for fresh presidential elections.

But what happens next if she does get the overwhelming vote of support which looks likely? • First, key clauses of the new constitution will take effect.
The country will have President Aquino and Vice President Salvador Laurel for six

years. Constitutional guaran-tees will be entrenched which will prevent the president from declaring martial law. The Senate will be empowered to decide the fate of the US bases after the leases on them expire in 1991.

 The Philippines will move towards being a nuclear-free territory, which has implica-tions for the use the US makes of the bases.

• Elections to the national legislature will be held in May, followed by local elections, expected but not confirmed for August. Mrs Aquino, then, faces four

main issues. She must invig-orate the economy and instil enough confidence to attract foreign investment to her country, which needs to promote growth sufficient to deal with a demographic explosion bringing 700,000 entrants to the job market each year. The country's economic problems are exacerbated by the fact that half of the population is under

relaunch the economy are likely to founder unless two other problems can be dealt with. The army must be brought to heel and united, which probably means moving gently to the right politically. The various extreme left rebal factions must be change will relieve the need for armed conflict," Antonio Zumel, a communist rebel leader, has said. The fourth issue is land reform, without which left-wing insurgencies cannot be contained.

Faced with an agenda like this against the background of

Alert against Anglomania

THE last thing any French administration wants to preside over is the victory of "Franglais"—and the death of good French, Chirac's government is, of course, no exception. Under his new budget law for 1987 every French ministry will

have to reveal how much money t is spending on strengthening he French language.

The move is welcome news to Philippe de St Robert, head if a special watchdog commission set up three years ago by resident Mitterrand to defend he French language.

Formerly a journalist on Le donde, his task is to conquer what one paper has called galloping Anglomania"—by which it means the widespread se of English words such as 'le fast food" and "le chewing "m" in France. St Robert is determined not

o lose what many see as the attle being fought against attle being fought against inglish linguistic and cultural mperialism. He says "I'm not rying to organise a witch-hunt

"I'm a qualified engineer but I'd like to retrain as a stock-

Men and Matters

against Franglais—all I ask is | craft financing to that Frenchmen realise their language is worth defending." Nevertheless, he faces widepread hostility and his powers are limited. His commission regularly dreams up new French words, which it hopes will make Frenchmen give up the offending Anglicisms.

The attempts are not always successful. "Le baladeur," which was intended to stamp out "Le Walkman," has failed to catch on. And "Le restaupouce," his answer to "Le fast food," has always been a dismal

At least St Robert can count upon wide support among differing shades of French political opinion. In France defending the language is a cultural matter, not a political

High flyers

London's legal eagles are learning some tricks from their City friends who have been so busy awarding themselves tele-phone number salaries in the name of Big Bang.

The latest lure for bright young lawyers is an instant partnership — a status which used to have to be long and hard-earned in the traditional London practices — as firms try to build up specialist legal expertise in niche areas. Richards Butler, which ranks about 12th in the City pecking

order of solicitors, and is currently discussing a merger with Cameron Markby, is appointing two new partners— Jeffrey Sherwood and Colin Thaine, both from Knapp-

Together with David Beety, who joins as a consultant, they will bolster the aviation department offering legal services to manufacturers, airlines, and some vigorous, by City stan-banks, on everything from air-dards, language about Sizewell's

licensing.

With the aircraft market estimated to be worth at least

\$200bn to the end of the decade, and with airlines increasingly content to be simple operators, leasing the equipment they fly, the new team expects to have plenty to keep it busy.

Paper tigers

Meanwhile, competition is also hotting up in the rarefied atmosphere of the legal press. The current issue of the New Law Journal, one of a handful of papers serving the British legal profession contains a fine example of the art of putting the boot in to potential rivals. "The nature of the market," says the Journal loftily, "...demands that materials, how-

demands that materials, however lightened by humour,
sarcasm, irony, or innuendo,
have to be presented for consumption by a knowledgeable,
readership, often better informed on the issues of the day
than those assembling them."

With magnanimity the
Journal proceeds to welcome
the impending birth of two
"glossy" rivals, adding the "glossy" rivals, adding the rider "We hope they will not represent the triumph of optimism over experience in what is not an easy market."

Lifebelt

The proposed pressurised reactor at Sizewell (estimated cost towards £2bn) is not just another job for Britain's process plant industry, It is the industry's only life-belt — well, so stockbrokers Savory Milln spell out in their new review of the British engineering industry.

Editor Sidney Rennert uses

importance to the future of British engineering.

"Britain's hard-pressed process plant industry (turnover around £3bm a year) is holding its breath as the current debate on PWR nuclear stations nears its climar. Sizzwell represents the one bright proposer for a the one bright prospect for a sector which is likely to see an 8 per cent downturn in UK

business over the next three

years. "Big new chemical plants are out for the foreseeable future, as are steel mills. Oil and gas projects (particularly in the North Sea) have been cancelled or shelved, and even the latest rise in oil prices has not reversed the trend. Only food processing is enjoying good, stable business . . ."

He could suggest, "go, buy a farm" — if it wasn't for the common agricultural policy's latest constraints.

Stop watch

Working for GEC teaches you a lot about the hard-sell, Dr Derek Roberts, the group's technical chief, demonstrated the other day.

No, he was not offering a further comment on the Nimrod affair. Rather, he was fascinating a packed audience at the Royal Society of Arts on the use of electronics to control pain. He talked about a device

rather like a wristwatch, which worked through the use of acupuncture needles to block pain signals. The wearer would simply punch a command into a miniature keyboard, and the microcircuitry would arrange a twiddle from the appropriate needle.

Dazzled by the thought of the international relief of pain—not to mention the sales possibilities-his audience held its breath.

"You see," said Roberts
12conically, "I could sell a

laconically, "I could sell a million of them before anyone discovered they didn't work."

NO REASONABLE person can go along with the view that there is some kind of moral equivalence between the two superpowers. To be sure, the the whole, its political and moral values overlap to a remarkable extent with our own. By contrast, the other superpower is, on the record to date, expressly committed to a set of political and moral values which are both alien and hostile. Yet last week circumstances conspired to make it impossible not to compare and contrast these two great countries.

Last Tuesday in Washington, President Ronald Reagan de-livered the annual State of the Union address to the combined houses of Congress. On the same day in Moscow, Mr Mikhail Gor-bachev delivered a long policy speech to a plenary session of the Central Committee of the Soviet Communist Party. Both leaders dwelt on the fact that 1987 is an anniversary year, for Soviet citizens, the 70th since the Revolution, for the Americans, the 200th since the Con-stitution. But there all simi-larities ended.

The purpose of Mr Gorbachev's speech was to urge the case for reforming the Soviet politico-economic system — a reform which, he would have us believe, is as urgent as it is ambitious. It confirmed the by now familiar image of a leader who is earnest, modern and vigorous and auxious to improve the performance of the Soviet the performance of the Soviet economy. The novelty was that on this occasion, his proposals for the first time seemed to go beyond the realm of administrative toning-up, and to trespass daringly on the territory of genuine political reform.

genuine incentives for position, His half-hearted reference to the Frangate scandal in future be conducted on the basis of multiple candidacies and secret ballots looks like a reform of a different order. At the very least, it could be perceived by the old faithful as a rather profound attack on the bessence of the shows and the pecking and the pec

1 25119

The contrast with the corresponding event on Capitol Hill could hardly have been more stark. President Reagan's of one-liners, some of the familiar elements of his Administration of the manifest of his Administration of the manifest of his age should after an operation, have The contrast with the corresliar elements of his Adminis-tration's policies. But the mani-fest purpose of the performance was not so much to mobilise support for these policies as to project a reassuring image: re-assurance that he had recovered former should, after an operation, have a restricted attention span and need frequent pape; it is under-standable that a man who spent his formative years as a per-former should remain a perfrom his recent operation, reformer. But it is not reassuring assurance that he had recovered that a man with these disabili-

In short, this was politics as guessed.

more. The saccharine sentimentality of President Reagan's profession of faith in the greamess of America may well have appealed to the viewers in Middle America, but it is in Middle America, but it is difficult to believe, after all that has happened in the past few weeks, that America can still

power and the pecking-order of would be a winning note to the party. strike with a Congress which is controlled by his adversaries.

likely to be a moderniser but not a real reformer; he wanted weeks, that America can still to make the Soviet system work be governed credibly on the stamp on corruption, theft, nepotism and other abuses; but

just do not have the choice of another way. We must not retreat and do not have anywhere to retreat to."

The reason why he has no other choice, as this and other recent speeches make clear, is that far too many of the bene-ficiaries of the old Soviet system are resisting modernisa-

No doubt he should have guessed from the beginning that there was no chance of bringing the mechanisms of the Soviet economy up to date without rather profound repercus-sions on the political system.

poise despite the Irangate scandal, reassurance that the Great Communicator can still win back his old popularity by looking good on the small screen.

In short this was politics as the bracing uncertainties of a more competitive and less arbitrary environment. Or perhaps he did know these things and preferred to keep quiet about them until he had more thoroughly consolidated his

> Either way, last week's speech represents a fundamental attack on the Soviet legacy. It is a fundamental attack because, while the most recent culprits

1940s, when society had been tackling entirely different tasks... The further we go with our reorganisation work. the clearer its scope and significance become; more and more unresolved problems inherited from the past come out."

In other words, there have been fundamental flaws in the system which have their roots in Stalinism and, by implication, in authoritarianism. What makes this such a fundamental attack is that it implies at least a partial repudiation of the only system most Soviet citizens have ever known. What is less clear is the

calculation underlying this attack. Is it the confident declaration of a leader who calculation now believes that he and his friends control enough of the friends control enough of the strings of power to be able to carry through a radical programme of political reform? Or does it amount to a high-risk gamble, reluctantly undertaken by a man who has been forced to acknowledge that he cannot, of the control of the carnot after all, secure the economic modernisation required to keep the Soviet Union in the superpower league without embarking on the turbulent waters of political change?

By itself, the democratisation proposed by Gorbachev does not inevitably mean a very profound change in the system. The provision of a certain amount of choice between rival candidates for party-controlled jobs and the use of secret ballots should "The theoretical concepts of socialism remained to a large extent at the level of the 1930s-1940s, when society had been the secret ballots should open things up if, but only if there is widespread support for a different kind of political culture.

The problem is that the people occupying the padded seats are products of the old political culture, that Russia has absolutely no tradition of democracy or pluralism, and that the top-down nature of the Soviet power structure may en-sure that each tier will continue to be more respectful of the next tier up than eager to test the limits of the new freedom.

Moreover, the picture offered by Gorbachev goes beyond the simple adjustment of voting rules in party committees, and implies other changes which must be alarming to the beneficiaries of the status quo.

which means not just the self financing of enterprises but the election of managers. "The point at issue is one-man management. We think that electiveness, far from undermining, on the contrary enhances the authority of the leader." In other words, there will be no more safety in numbers.

The corollary is that "control from above" needs to be balanced by more effective "control from below." "Without developing democracy, without the broad participation of the working people, we will not be able to cope with the tasks involved in reorganis-

That is a discovery which most western countries made many years ago. As President Reagan pointed out that same day: "Our revolution is the first to say the people are the masters, and government is their servant."

Mikhail Gorbachev does not go quite that far in a perora tion that strikes an impres-sively civilised note. "We wish to turn our country into the model of a highly developed state, into a society with the most advanced economy, the broadest democracy, the most humane and lofty ethics, where the working man would feel that he is master.... And even sceptics would be forced to say 'Yes, Socialism is a system serving man, working for his benefit, in his social and economic interests, for his spiritual elevation."

Lombard

Old Masters, jobs and prices

By Samuel Brittan

fessor Tibor Scitovsky and re-printed in the current issue of Lloyds Bank Review. Scitovsky has not succeeded in my view in making the case for anti-libertarian measures, such as compulsory hours reduction or early retirement. But in his attempt to do so he has raised other interesting issues.

The standard view is that provided there is enough pur-chasing power, there can always be demand for the fruits of higher productivity; and that people can make their own de-cisions whether to enjoy their fruits in take-home pay or more leisure, or some mixture of the two. The more classical economists suppose that purchasing power will rise automatically even if there are temporary fluctuations. Keynesians believe that demand may have to be helped by injecting more money into the economy — the advice which is now being showered on Japan and Germany.

Scitovsky queries this conclugoods." This category was invented by Hirsch to cover a great variety of desires—from that to be more fashionably dressed than other people or to be awarded rare distinctions, to the search for places of undisturbed natural beauty or for Old Masters. What they have in common is that their supply cannot easily be increased. The cannot easily be increased. The search for them is nearly a zero sum game. The more I have of them, the less you do.

Scitovsky's argument is that after a certain level of affluence is reached, people will want to spend any extra income on such goods and hardly at all on the newly-produced goods and ser-vices which figure in GNP. Therefore their spending will not generate jobs, but simply heart prices in many coses. boost prices—in many cases asset prices which do not appear in cost-of-kiving indices.

mises of the argument. There rise.

THE MOST interesting attempt are still many people in London yet to rehabilitate the lump of and New York—let alone the labour fallacy—that there is only Third World—who could do so much work to be done and with more to eat. There are, that compulsory work-sharing is too, possibilities of substitution. required to prevent unemploy-ment—has come from an eco-beaches brings tourism to farnomics professor. It is con-tained in the 1986 Fred Hirsch Masters rises, some demand gets Memorial Lecture given by Pro- diverted to modern art. There are devices such as evening and Sunday opening of galleries to make existing stocks go further.

Let us, however, forget all these qualifications and assume that there are only three ways of enjoying higher productivity: newly produced "GNP" goods, leisure, or "Old Masters"—a catch-all for all assets in fixed supply.

Scitovsky recognises that owners of Old Masters will be enriched as they sell them; but he assumes that they use the proceeds to get out of debt proceeds to get out of debt rather than to buy more newly produced goods. There must be some ilmits to this, however; and if the owners of Old Masters do not need to buy more goods at all, there seems no reason why they should continue to sell. In that case Old Master prices will rise towards infinity.

To put it another way: newly produced goods fall in price relative to Old Masters; and leisure becomes cheaper relative to newly produced goods. sion by bringing in "positional Normal economics would sug-goods." This category was gest a shift of demand both to newly produced goods and to leisure of a voluntary kind. The elasticity of demand both for newly produced goods and for leisure would have to be zero to produce the Scitovsky problem; and even then I am sure there are more libertarian answers than compulsory worksharing.

The real problem is different. This is that assets in fixed or inelastic supply may well become important as living standards rise. These prices do not, however, figure in conventional consumer price indices, which the prices w therefore understate the price level as it appears to most citizens. Prices of "art objects" have, according to Scitovsky, been rising at 6 to 10 per cent per annum faster than the genper annum raster than the gen-eral inflation rate for the last 30 years. Price stability and "zero inflation" become more prob-lematic goal as living standards

Development - | risks

From the Director-General, Council of Mechanical and Metal Trade Associations. Organisations to senting the interests of con sumers have been so active and vociferous in promoting the case for more stringent legisla-tion concerning strict product liability that the position of British and European manucustomers) is not always fully

The Consumer Protection Bill provides, inter alla, a regime of strict liability whereby those who suffer damage from defective products will be entitled to compensation from manufacturers without any manufacturers without any need to prove that the manu-

great and unquantifiable burden on the manufacturer in making him liable for therau-teristics or failings of his pro-ducts which may not be fore-seeable at the time they are made. This will add enormo to a manufacturer's costs and inhibit research and develop-ment work unless there is an adequate safeguard. Such a safeguard is provided in the Bill and is known as development risk defence which relieves the manufacturer of liability for defects of which the light of the state of the art at the time of manufacture. The House of Lords voted in favour of this defence in the committee stage debate and the Bill now goes to the

It is quite illogical that consumers should expect safer products than are technically feasible at the time of manu-facture. This would require the manufacturer to provide for the future unknown!

Scholarly, lucid and useful

From Professor G. Wood
Sir.—Having read (January
16) your short editorial on the
Institute of Economic Affairs
publication "Keynes's General
Theory fifty years on," I
awaited the arrival of my copy with little excitement. I ex-pected a duli and sectarian volume, one rich perhaps in polemic but certainly poor in

ideas and in analysis.

Your leader writer misled
me. The essays are scholarly,
lucid, and useful. There is a discussion by Leland Yeager of pre-General Theory attempts to construct "monetary disequili-brium theories" — theories which attempt to explain sticky wages and prices, and to analyse their consequences for the economy—and a careful linking of these early writings with modern developments of that approach. There is stimulating analysis by Milton Friedman of why Keynes's work proved so influential in the conduct of policy. There are studies of Keynes's methodological legacy; of the interaction between events of the 1930s and his theories; discussion of theories; discussion of economic policy in Britain

today; and more. It is a short book from which few economists could learn nothing, and most readers would learn a great deal. Your leader writer should not confuse clarity of expression with lack of content. (Professor) Geoffrey Wood. Centre for Banking and International Finance. City University Business School Frobisher Crescent.

Barbican EC2. Congestion at airports

From the Editor, Airports International Sir,-Mr R. Powrie's conten-tion (January 27) that congestion in the South East's airports could be met by further developing regional hubs and building up Stol (short take off and landing) services is in no way the

answer to the problem.

The growth of regional hubs like Birmingham and Glasgow is already happening, because the airlines want to fly there and the passengers want to travel there. Manipulating the

have the Civil Aviation Anthority do, would not solve the problem and would be most inopportune at a at a liberal bilateral agreements between European countries and a tion are bringing down airfares and increasing services. What is more, the growth of the regionals is being complemented by the growth of traffic in the South East as well; the regionals are not growing at the expense of London's airports. The problem with Stol services is that in terms of air transport move ments they are highly ineffi-cient. A Boeing 747 can take over 400 passengers and counts as one air transport movement. Stol aircraft would be unlikely to take more than 100 passen-gers, which means that four air transport movements would be needed in a Stol operation for one widebody.

Airport congestion is not necessarily a problem of coping with peak movements; when bad weather hits and an airport is closed there has to be sufficient capacity for operations to continue safely nearby. Stolports would not meet this need. Only runways of 3,000 metres or more can sufficiently provide the back-up.

If passenger traffic continues

as at present the number of international travellers will international travellers will double within the next 18 years. If airports and air traffic control authorities worldwide are to cope they beed more runways and larger aircraft with very high passenger load factors. Philip Butterworth-Hayes.

Incentive schemes

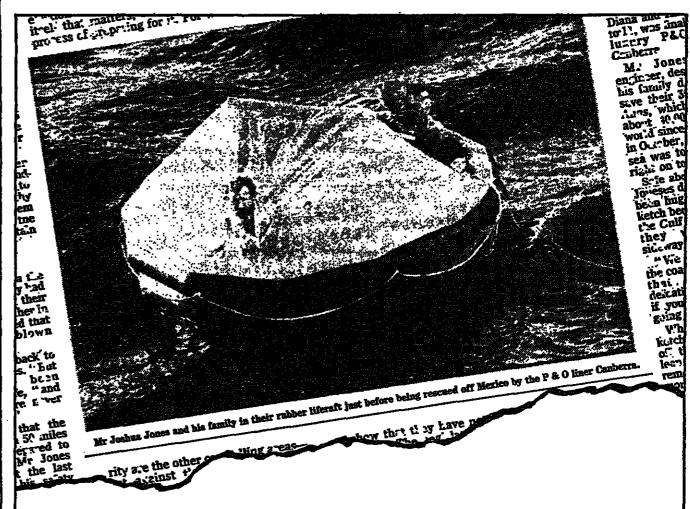

From Mr P. Murray.

Sir, - Your article of January 27 on performance-related incentive schemes examines closely the likely institutional reaction to the controversial share option scheme proposed for senior executives of the Burton Group. The background of Inland Revenue approvals for similar schemes sketched by the article potentially misrepresents, however, the much tighter

restrictions on Revenue approved schemes. In addition to the limit of four times earnings, there is a further limit on the value of options at the subscription price of £100,000 for any individual if the scheme is to secure Revenue approval.

Regardless of arguments

whether schemes providing for prospective individual gains are nuinely necessary to motivate the senior executives concerned. it should at least be clear that at this level the beneficial tax provisions of Schedule 10 of the 1984 Finance Act do not apply. P. E. Murray, 3 Old School House,

Keeping the Jones's up is our business...

Worries over yen for bonds

SHORTLY before 3am on Thursday and Friday, Tokyo time, a flurry of phone calls between dealing rooms in Kabuto-Cho and Wall Street will settle the anxious question of whether the Japanese will come to the US Treasury's quarterly bond

The lead-up to auctions is always tense because billions of dollars ride on traders' last-minute judg-ment of investors' appetites. This time, the tension is heightened by the turmoil in the foreign exchange markets. Will the Japanese, prodigious bond buyers in recent years. overcome the fear of currency losses and return for more?

If they do not, other investors could suffer as prices fall to mop up the heavy supply of bonds. Dealers who misjudge Japanese intentions could take huge losses within hours of bids closing at 1pm Wednesday, New York time, for \$9.75bn of 10year bonds and a day late for \$9.25bn of 30-year bonds.

The early warning signs from To-kyo last week were highly discou-raging. Many big institutional in-vestors, disturbed by the dollar's instability, said they had no intention of buying if it meant exposing themselves to further foreign exchange losses.

ample, estimated that Y4,000bn had been knocked off the value of their dollar-denominated investments since the industrialised countries Plaza agreement triggered the dol-lar's slide 15 months ago. To a large extent the Japanese

are stuck with dollars. Most international trade is conducted in them. So Japan's record trade surpluses generate enormous piles of dollars which need investing. None the less, the painful devaluation has already prompted some change in investment patterns.

Since a peak early last year when they took two thirds of the Treasury bonds at each auction, the Japa-nese have been buying diminishing quantities. They have also diversified to a small extent into shorterterm US Treasury bonds, higher yielding US securities such as corporate bonds, junk bonds and equities and property to give a bigger cushion against further devalua-tion. But they have also switched some money into, for example, Australian and Canadian bonds and land reform, a military rebellion

Japanese investors are divided over whether the dollar is near bottom or has further to fail. They would be more confident if the US showed any commitment to the currency stabilisation agreement reached late last year by Mr James Baker, US Treasury Secretary, and Mr Kiichi Miyazawa, the Japanese Finance Minister. Instead, mistrust and anger has grown as Washing ton continues to talk the dollar

Given the pain the low dollar/ high yen has already inflicted on them, the Japanese seem ready to seize on any small sign that help is at hand. Thus, there were widespread reports in Japan last week that the US had intervened in foreign exchange markets to support the dollar. There was no evidence in the US of such an uncharacteristic

In more concrete terms, the dollar has recently bounced back several times from the Y150 level, most strongly last Friday on the unexpectedly big reduction in the US trade deficit even though the figures did not look quite so good on

Some American analysts think US bonds remain a good invest-ment for the Japanese. To some extent the foreign exchange losses of early bond buyers have been offset by capital gains as bond prices have risen roughly 20 per cent a year during the market's long rally. Since prices hit a plateau in the middle of last year, the dollar has fallen less than 10 per cent.

Moreover, US bonds continue to offer yields more than two percentage points greater than on Japa-nese bonds. Buying at today's ex-change rates, investors would still break even if the dollar fell to Y124 in the next 10 years, calculates Mr Robert Brusca, chief New York economist of Nikko Securities.

The next few days will be crucial to restoring sufficient Japanese confidence in the dollar to encourage them at least to nibble at the bonds offered at the auction. Some help might come from tomorrow's release of December's US leading economic indicators. These are ex-pected to show reasonable growth which might lengthen the odds on a cut in US interest rates and thus strengthen the dollar.

But even if a slightly firmer dollar does encourage some buying this week by those Japanese investors who are more trading-oriented, the longer-term outlook is becoming even less favourable. US economists are starting to forecast higher growth, inflation and interest rates which add up to an unattractive

THE LEX COLUMN

Malthus haunts the markets

While the world's equity markets (apart from Germany) are skipping through new records virtually every week, it may seem churlish to examine the gathering demographic clouds which threaten terminally to engulf those markets somewhere around 2020.

None the less, a bull market - indeed any equity market able to raise new capital - depends upon a healthy flow of new demand for equities. On current trends that decentury.

It seems only a few years ago that analysts in the UK were wondering where the great riches accu-mulated by pension funds would find a home; between now and the end of the century attention may switch to estimating when institutions will become net sellers of shares and who, if anyone, is going to step into the breach.

Demography

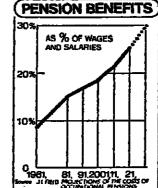

The demographic problem is easily stated. UK government statistics estimate that the number of people of pension age will increase from 9.9m in 1984 to 12.5m in 2025 while the working population stays almost static. Put another way, the ratio of pension contributors to beneficiaries falls from 2.3 in 1984 to 1.8 in 2025.

A 30 per cent increase in the number of pensioners will place the entire flow of personal savings under pressure sometime between 2010 and 2020, and institutional cash flow into the equity market could be particularly vulnerable. About two thirds of annual personal sector saving is now channelled into life assurance and pension funds which together own

about half of all ordinary shares

quoted on the stock market. According to Phillips & Drew the total cash flow (contributions and investment income minus benefit outflow) of UK pension funds and life companies was £18bn in 1985 and will rise to £5.2bn in 1986 and indicate that the authorities had run significantly ahead of schedule on funding. The Bank appeared to be attempting to reduce the total of £7.5bn in 1985, and it will rise to £7.5bn in 1986 and £8bn in 1987. company and government new is-

more people out of Serps and into funded schemes, because of its own financing worries, could be just handing the future problem from gilts to equities.

THE TOTAL

But there is a hint of Malthusian logic in these prophecies of Armageddon for the equity which suggest that something - if not a sudden burst of fertility - will turn up. Indeed, something may be at hand in the shape of £80bn in overseas portfolio investment.

It is as open to pension funds to run down these assets as their UK equity holdings; the London market is not necessarily doomed by growth in the army of UK pensioners. Yet the likelihood is that fund managers will do some of each: prudence suggests that a greying population should have some of its sav-There is no consensus among ac- ings invested in younger, more

ing market share. Nevertheless,

to narrow. The nervous calm in the secon-

dary market, and the current difficulty of arranging swaps out of dollar issues, meant that new issue managers continued to concentrate on the currency sectors.

One of the most successful deals was an Ecu 350m bond for the EEC. which unlike most Ecu issues in recent months evoked demand from European as well as Japanese in-

The attractiveness of the issuer's name meant that this deal was a poor indication of interest in Ecus in general. On the other hand, some dealers said that European investors were beginning to be persuaded once more of the appeal of the sector.

This, they eaid was because yield differentials against D-Mark bonds were nearing their historic highs

downwards, yield margins tended since it would relieve the pressure from the D-Mark on the weaker currencies within the European Monetary System - could open up the prospect of lower interest rates in Europe.

> The Australian dollar market, which has seen an unusually high number of new bonds this year, was looking less healthy. Dealers said that the Australian dollar's decline against the D-Mark had led to a suspension of orders from German retail clients who are usually key buyers in this market. At the same time, underwriters were becoming increasingly nervous as payment dates on many of the recent issues

were approaching. Most of the week's new issues traded at levels outside their total fees, with the A\$40m bond for Landesbank Rheinland-Pfalz quoted at a bid price as low as 3% points be-

LTV lifts income before charges

By William Hall in New York

LTV, the second-biggest US steelmaker, almost doubled its pre-tax, pre-interest operating income to \$171.9m in 1986 but reported a net loss of \$3.25bn, or \$35.41 a share, for the year mainly because of special charges associated with its bank-

ruptcy filing last July.

The group reported fourth-quarter income of \$146.6m before provision for Chapter 11 non-cash special charges of 5600m. The latest charges recognise potential claims which may arise during LTV's Chapter 11 proceedings from the rejection of executory arrangements, such as leases and take-or-pay con-tracts, which the company considers burdensome or non-essential.

The latest figures reflect an improvement in the group's troubled steelmaking operations which pre-cipitated the bankruptcy filing. The steel operations had operating in-come of \$130.5m in the final quarter of 1986 compared with an operating loss of \$50.7m in the same period of

The improvement resulted primarily from reduced raw material costs due to not taking coal and ore under certain pre-Chapter 11 purchase contracts.

The long strike at US Steel, the biggest US steelmaker, helped the company in the final quarter but was not sufficient to stem a 14 per cent decline in shipments to 2.3m tons which the company blames on weakening domestic demand and continuing high levels of imports. The group's steel mills were operating at 62 per cent of capacity in the final quarter.

LTV's profitable aerospace operations reported fourth-quarter operating income of \$38.5m compared with \$47.5m in the same period of

The group's energy products had a \$5m operating loss in the final quarter compared with a \$1.2m loss in the same period of 1985.

is buoyant enough to justify substantial tax cuts—£2bn may turn out to be a minimum—without jeopardsing the PSBR.

If this is how the Treasury

sees things, there was no pres sing case for leaving the British

Gas loan until next year. Indeed, the extra cash now

could mear a very good PSBR this year. What better back-

ground for the Chancellor to point to when announcing his

It also appears that the trend

in MO growth may be turning round just in time to leave the Chancellor's hand free if

he wants to cut base rates as the icing on the cake. Although there is some diffi-culty in sorting out the com-

plications of unadjusted and seasonally-adjusted money sup-ply data, it appears possible that MO's growth fell sharply

in January. Greenwell Montagu estimates

that, on a seasonally-adjusted basis, the 12-month growth rate

of MO fell from 5.4 per cent to 5.0 per cent but the unadjusted 12-month rate is forecast to have fallen from 5.2 per cent to 4 per cent and this is the figure which will appear in the Bank of England's January Press

Janet Bush

sector recently.

IN TERMS of price movements, the short end of the market, the gilt-edged market had a very which could go some ways todull time last week. But, as the Government retreats further and further behind its pre-Budget purdah, there have been some fascinating indicators of what might be going on behind

On Tuesday, the Government announced it was taking the first tranche of the British Gas loan this financial year, effectively knocking £750m off the Public Sector Borrowing Re-

quirement.
Given that talk of a £5bn PSBR was beginning to have an air of over-modesty about it; it had been assumed that the Government would use the loan next year as extra leeway for cutting taxes or to cover for possible overruns on spending.

The Treasury had been attempting to dampen down optimism about a substantial undershoot of this year's PSBR target. It is emphasising revenue features such as payments of composite rate tax by building societies which are now spread over the full year instead of being bunched into the final

It certainly serves to be cautious in making predictions for the full-year PSBR with the for the full-year PSBR with the last three months to go. But to conclude from the Gas decision that there is official concern about even hitting the PSBR target flies in the face of evidence which suggests that January will be another bumper month for tax receipts. Indeed Transpur officials compily deed, Treasury officials openly admit that the PSBR could be heading for an undershoot.

It is also believed that the Treasury has been shifting re-venue into next fiscal year and bringing expenditure forward into this year, another sign of a comfortable position on this year's PSBR. In addition, there is some evi-

dence that the Bank of England has been buying in more gilt-edged stock than is usual at this time of year and that the pur-chases have not necessarily been confined to issues shortly due for redemption. One obvious conclusion must be that the Bank is trying to cut its overfunded position, which stood at around £1.5bn at the end of

ecemper. The Bank's purchases appear to have been concentrated in US MONEY AND CREDIT

THE recent gyrations in the foreign exchange markets must

The dollar fell sharply, touching a seven-year low of DM 1.7680 at mid-week, amid Broker has not tapped the market for the past two Fridays, even on a parity-paid basis. been intervening to stem the slide, and talk of a possible emergency G5 meeting. Finally, The question is how much buying in there has been on house put at several hundred millions—and whether this can be taken as a indication that the release on Friday of the latest US trade figures, showing a trade deficit of \$10.66bn in December — smaller than ex-pected — fuelled a sharp end-week rally in the dollar's be taken as an indication that the PSBR will turn out even lower than market forecasts and fortunes.

At the shorter end of the At the shorter end of the market, interest rates rose towards the end of the week and by Friday six-month Treasury bills were yielding point more than a week earlier. However, the prices of longer-dated issues hardly moved and the honological. earlier. However, the prices of longer-dated issues hardly moved and the benchwark US Government long bond finished the week yielding a shade below 7.5 per cent.

The fate of the dollar continues the process of the dollar continues the dollar continues

the Bank's own internal planning projections.

Whatever the truth of the matter, all this suggests that the British Gas decision is nothing more than a red herring and does not point to difficulties with this year's PSBR. Treasury officials describe the decision as "administrative."

One possibility could be that the trend of revenues next year is huggant apought to institut The fare of the dollar continues to unsettle the market and traders are nervously awaiting the outcome of this week's Treasury auctions. Concern about the level of Japanese investors' demand for paper overshadowed other events last veek such as President Reagan's State of the Union speech and

the 0.9 per cent rise in December durable goods orders.

In the "junk" (below '/vestment grade) sector of the corporate bond market there were durable giges of a beatity appearance. further signs of a healthy appetite for double-digit yields. First Boston was able to increase the size of a 10-year senior note issue for Mitchell Energy and Development by \$50m to \$250m, making it the biggest so far this year. The issue rated Ba-2 by Moody's, carried an 111 per cent courson it d was

111 per cent coupon and was priced at par.

Meanwhile, there is considerable interest in the type of securities which the troubled BankAmerica plans to issue as part of its strategy to defeat the unwelcome takeover bid from inimelcome takeover bid from First Interstate. BankAn a rica, which has lost \$855m over the past two years, filed a \$1bn shelf registration last week but gave little indication of the type of securities it plans to offer. Salomon Brothers has been

January, 1987

Lucy Kellaway on the excitement in Dublin of the Alba field discovery

Aran waiting to cash in on its luck

"EVERY OIL company lives for the moment it might get lucky," says Mr Michael Whelan, managing director of Aran Energy. "For us, that moment has come with the discovery of Alba."

Shareholders seem to agree. On Wednesday last week the shares rose by a quarter, and at 50p, are worth nearly five times as much as a year ago.

The spur to the latest rise

was a report from Schroder Securities saying that the Alba field, in which Aran holds a 4 per cent stake, could be the fifth largest oil field in the North Sea, and hold as many as 700m recoverable barrels of oil. On this basis the broker says that Aran shares are worth between 75p and 81p, of which 58p is due to Alba.

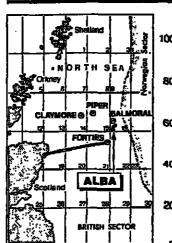

This kind of hype should have oil investors feeling pleasantly nostalgic — it has been a long time since any of the little oil exploration companies have come up with any discovery at all, let alone one that promises to transform the fortunes of the company.

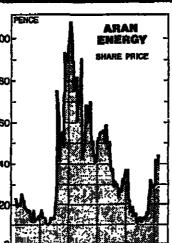

A happy coincidence of two oddities explains the present case. The first is Aran Energy itself. Aran, the largest of the Irish Exploration companies, is by the standards of its UK independent counterparts a tiddler. This means that a discovery will have a large relative effect on the value

of the company.

The Alba find is also pretty peculiar. Until recently the our shareholders what is going accepted view was that all the on, partcularly when the news big fields in the North Sea is as good as this," says Mr had already been found, and Whelan. Unfortunately such anyone wanting to discover a undiscrimatingly positive noises field containing more than say are of little use when it comes 250m barrels of oil would have to putting a rational value on to venture out west of the the shares. Shetland Islands, where costs are too high to be attractive at low oil prices. If Schroders are right this view has been

But are they right? Wood Mackenzie, does not think so. According to David Black the area is a "dogs breakfast of geology" and he estimates that the prospect could contain 250m recoverable barrels of oil, about one third of the Schroder

The company is not helping shareholders to get a better pic-ture of what is happening. This is not altogether its fault, as the discovery has been declared a "tight hole" by the operator, Chevron, and partners are obliged to keep quiet.

While the partners themselves do not know exactly how exciting the discovery is, they know a lot more than their investors, and have enthusias-tically budgeted for five further year, and are already discussing possible ways in which the field could be developed.

"We'd like to be able to tell our shareholders what is going

Yet these gestures have whipped up Irish oil punters in Dublin into a frenzy of excitement. Mr Whelan—an oil market bull of the sort rarely glimpsed since the price col-lapsed—can tell them a story that will make them want to go on buving.

with big ambitions. When he started Aran in 1972, he says it was the only oil company in Ireland. The others that have

85 86 87

acquiring Irish oil acreage, but by buying a Ceitic Sea royalty, which entitled Aran to a pro-portion of the oil produced in 37 Ceitic Sea blocks without having to bear any of the costs.

However, Irish oil prospects both in the Celtic Sea and in the Porcupine basin, where Aran has a stake in a discovery that is too expensive to develop, have proved a disappointment. The great blasts of enthusiasm which over the years have sent Aran's shares soaring have mainly come to nothing.

When the company decided to diversify from its Irish base, it did so in style, snatching Petrolex from under the nose of Saxon Oil, which had made an agreed bid for the company that vas due to close in less than 24

whipped up Irish oil punters in Dublin into a frenzy of excitement. Mr Whelan—an oil market bull of the sort rarely glimpsed since the price collapsed—can tell them a story that will make them want to go on buying.

Mr Whelan is an oil strategist with big ambitions. When he started Aran in 1972, he says it the bill well.

Apparently the bid was not as hasty as the approach might have suggested. Aran had decided that it need a presence in the North Sea, and wanted a company with a large number of licences. With stakes in about 40 North Sea blocks, as a well as a unit in the giant Forties oil field, Petrolex seemed to fit with bill well. the bill well.

No sooner was the deal made

sprung up since, all relatively small, were mostly offshoots from Aran.

The company grew not just by acquiring Irish oil acreage, but by buying a Celtic Sea royalty. take, which mr whelst claims he had his eye on from the be-ginning. "We had a firm appre-ciation of where that block might take us, although we were not optimistic enough, as things have turned out," he

> The production from the For-ties Field is now about to come into its own by providing full tax shelter for Aran's share of the appraisal drilling on Alba. In four or five years Aran exin four of two years Aran expects to be a much larger company. Mr Whelan is thinking in
> term of a "substantial" cash flow
> from Alba, which for the sake
> of tax efficiency will demand an
> "extensive" exploration programme to match.

Until then Alba will pursue what Mr Whelan calls a bridg-ing exercise. "We are not about to sit around for four or five years waiting for our jewel to be polished," he says, hinting that acquisitions of oil assets or of companies in the interim are more than likely.

Not content with this, Aran has other expansion plans in mind. One is to become a diver-sified international oil com-pany, something which Mr Whelan thinks Aran is better

Park Food set for Guinness purchase

By Philip Coggen

on Aran, he says, because it is "the senior oil company from PARK FOOD, the UK's largest packer and supplier of Christmas hampers, looks set to acquire Guinness's frozen foods distribution subsidiary. a soverign state with no industrial imperial past." Another, and even more curious, deal with the Middle Everfresh. Mr Peter Johnson, Park's managing director, said East is also planned for the more distant future. Aran owns yesterday that the company "hopes to make an announcement very soon" about the purchase. a site in Ireland by the deep Shannon Estuary which has full planning permission to build a

Last month, the Merseyside-based Park Food announced Having long since abandoned the idea that it might build a £250m refinery itself. Agan is now hoping that one of the Middle East producers might like to build their own refinery there to get access to a based Park Food announced that it looked set for a second year, with pre-tax profit; for the 12 months to March 31, 1987, likely to exceed last year's £2.27m.

Everfresh is one of Guinness' smaller subsidiaries and the consideration is expected to be only £2.42m. The sell-off will be the first disposal authorised by Guinness's new board, headed by Sir Norman MacFarlane.

there to get access to a European market. With so much going on it is perhaps not surprising that Aran has become a favourite bid candidate of late. The Irish Press has been alive with rumours that one of the London brokers has asked some of its larger institutional share-F. S. Ratcliffe holders to name their price, offering to pay at least 50p a For the six months ended October 31, 1986, the F. S. Rateliffe Industries group of

Rateliffe Industries group of precision spring manufacturing and painting contractors incurred a loss of £52,000, and the group will be in the red for the whole of the year.

However, a monthly profit was earned in November for the first time in many years; the overall rate of loss had been sharply reduced and that trend would continue in the second half, the directors claimed.

The directors regarded 1986-Nothing however appears to have come of this, and the company is hoping that its 19,000 shareholders will protect it from any unwelcome approach. No doubt Chevron, and per-haps some of the other partners.

would like to get their hands on an extra 4 per cent of Alba. either directly or by buying the company. Perhaps they are holding out

Auctions

A greater appreciation of the use of auctions in speeding up sales is reflected in the rise in turnover in sectors as diverse as commercial property, plant and machinery, fine art, agricultural land and car auctions

The gavel strikes it rich

By William Cochrane

rowth in recent years.

The London Auction Mart, which provides a central London venue for most of the firms involved in property auctions at the Connaught Rooms, reported another record year last October, when the total value of sales rose by more than 65 per cent to £209m.

The two biggest firms, Barnard Marcus and Allsops, use other hotels like the Kensington Hilton, the Berkeley in Belgra-

prime" category for yields in the 6 to 9 per cent range.

For the record, H & B say that prime yields have now moved control 4,5 and 8 per cent respectively; and "near prime" has acly bett quired a new description, hav-ing been dubbed the "Black Hole" for its lack of growth and subsequent marketability.
This has prompted investors

like the Commission for the New Towns and British Rail to the market, with statutory asset disposals or simply surplus properties to shift. Whether this is a trend or a

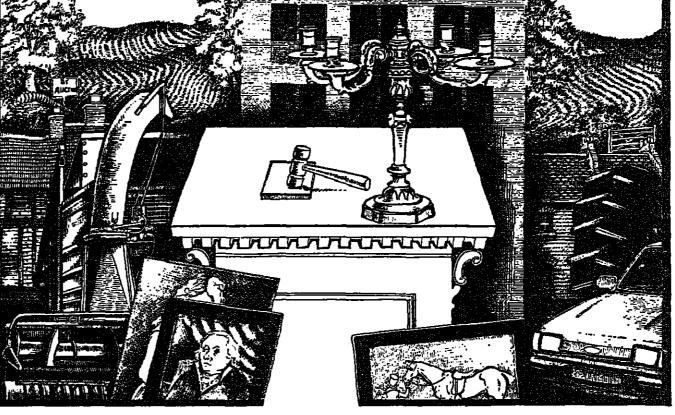

temporary expedient remains to be seen. Professional auctioneers argue strongly that their speciality should form a stable

speciality should form a stable and growing sector of the property investment market. But they also remember what the market has been.

"Traditionally," says Chris Drury, partner in charge of the auctions department at Jones Lang Wooton, "auctions may have occupied the same sort of role which jackals and hyenas have performed in Africa—not exactly scavengers, but cleaning up the scrag end of the property up the scrag end of the property market, like secondary shops and Victorian houses in all sorts of twilight areas". JLW realised under £10m at

auction in 1984. In 1986 it achieved a record £8.1m for one lot, a 10.3 acre former British Rail site in Drayton Bridge Road in West Ealing, West Lon-don, within a total of £35m to

Mr Drury expects substantially better results for 1987, maintaining that in the last few years, auctions have moved to the front line in secondary property. "A few years ago," he says, "people asked why they should

He says that auctions provide, more than any other method of sale, the prospect of schieving a quick result. In a four-month period in the second half of last year JLW offered about 30 propperies in four sales. The market-ing period for those properties began six weeks before the sales. All of them sold either at or before the auction.

He maintains that private treaty, the method whereby one investor sells to another in much the way that private houses generally change hands, would never have matched this

"With private treaty, you first make the deal, and then you make the legal inquiries," he notes. "In an auction the inquiries are made before you

Dick Price, now a consultant to Healey & Baker, but still ac-tive as an auctioneer, has been associated with the auction market since 1964. In 1969, he recalls, he sold Hampstead Gar-den Suburb, 5,000 properties for

go to auction." Now he says, the a total of £2.45m, in just one lot. question is "why not?"

He provides the most cogent He provides the most cogent

argument for the continuity of the auction market, in that he price levels throughout the 40s, 50s and 60s. Healey & Baker is mostly associated with the re-tail market, although the percentage of shops in its auction sales has dropped as the firm in general has broadened into the office and industrial sectors property.

H & B's auction sales rose from £12.5m to £19m last year and partner David Masters says that the firm is aiming at the quality end of the market where property companies, trust funds, charities and institutions compete with the private

There is no discrimination in the auction room. In chronologi-cal order, this has clearly been an attraction to Hasidic Jews, Kenyan Asians, British-born Indians and Pakistanis and, most recently, buyers from the Far

For the auctioneer, says Tony

Trump, who has filled that role for Edward Erdman since 1983, standing on the rostrum is only 5 per cent of the job. Preliminaries would start with a conversation agreeing a reserve price for the property, followed by terms of appointment for the auctioneer; Mr Trump, would then instruct the vendor's solici-

tor and after that, he says, "the real action starts". He and his team inspect the property, measure it, plan the legalities and the software like Erdman's detailed and recently redesigned catalogue.

After that there is usually a period of a month when the catalogue is on the streets and bids before the auction may come in. "I will sell in advance only when I get a bid which I don't think I'll better in the room", he says, adding that such a price would have to be considerably better than any guide price he would give the poten-tial purchaser at that stage.

On the day, the customer gets some opening banter, a detailed introduction and explanation of the ground rules and the cataremember rightly, it was Irish logue, including addenda on agriculture....".

The future

Need for guidelines

THE CONTINUING success of auctions in selling real estate will depend on both vendor and purchaser maintaining faith in

In the art world such confidence has recently taken a knock as a result of the case involving Christie's which has fortunately now been settled out of court in the United States. Mr David Bathurst, president of the firm in the US, held a sale of eight pictures, only one of which sold. However, Mr Bathurst told the press that three paintings had gone under the hammer, in order to protect his client and the art market

Already in this country this case has led to Westminster Council introducing legislation under the Greater London Council General Powers Act 1984 which requires all auction houses in the borough to be licensed. This includes the Con-naught Rooms, the home of the London Auction Mart, the pre-mier real estate auctioneering organisation in the country. Any malpractice, and the licence could be taken away.

matters of detail which may do not want government legislahave come up or been altered tion regulating their activities. Since the catalogue was printed. Most of the leading auctioneers Auctioneers remark upon the excitement which can fiare up on the floor, leading sometimes to a particular lot making a guidelines to spell out good price much more than expected. The deal is nailed down immediately afterwards in an adjoining room, where a buyer can get coffee, help to fill in the contracts which form part of the

FOR THE URGENT ATTENTION OF

ALL MANUFACTURERS AND DISTRIBUTORS OF CONSUMER GOODS

1(0)121/4/

Stock Surveryors, Valuers and Auctioneers

We are offering you the most unique up-to-date service, which will be fundamental for the present and future profitability of your business.

Our organisation offers you an efficient, comprehensive and reliable proven method for selling your company's products, achieving the best going market price for them. We are holding regular substantial public auction sales at venues well away from your conventional customers where your goods will be offered for sale direct to the public. We will not disclose or advertise the origin, the brand or the prices of your merchandise prior to the auction. As we offer the goods for sale only at the time of the auction at an extremely fast pace, on an immediate view and sale basis, the sale price is only determined by the highest bidder at the time of the auction and therefore gives your company a tremendous sales outlet for your merchandise. We also have international companies with immediate cash funds who will purchase all kinds of consumables by private treaty.

We will ensure not to interfere with, or damage, your present and future relationship with your normal day-to-day trading activities. All the business transacted together will be highly confidential at all times, and we shall adhere to your instructions and the agreed terms and conditions of sale to the letter.

We shall accept your instructions for selling on your behalf your excess stocks, out of season or out-dated merchandise, end of lines, returns, used travellers samples, or current and future production in excess of your regular customers' requirements.

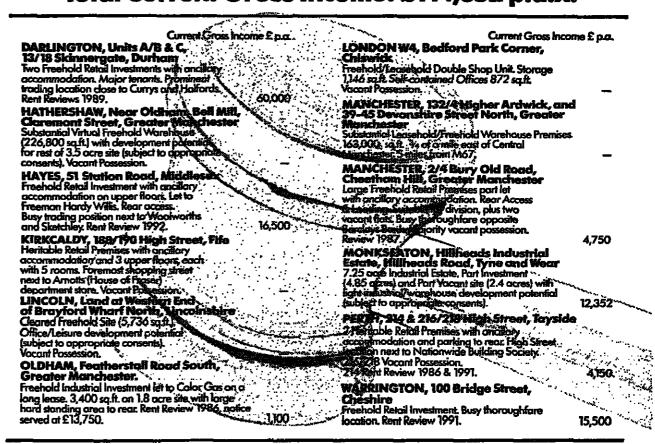

We hope that you fully understand the total sales concept we are offering you and realise the extra benefits your company will receive, i.e. which will eliminate your having to sell your excess stocks to the **CLEARANCE BUYERS** at **GIVE AWAY** PRICES. Allow us to resolve your present and future problem areas now.

All we require from you and your company, wherever possible, is your sales literature, price lists and samples. Just leave the rest in our company's capable hands.

We would be most interested to learn if you wish to join in our successful organisation for selling your products and would like to discuss the above in more detail with you at the earliest opportunity.

PLEASE PHONE NOW: 01-408 1612 OR TELEX: 299004 Head Office: 67/68 New Bond Street, London W1Y 9DF

A platform for the best sales

best of two worlds: it can be used as a platform for a sale by

private treaty if circumstances

dictate. For example, if the

auctioneer receives a good offer

prior to the auction, he may advise his client to accept it,

while if a property does not sell on the day, it could well sell

afterwards, either later that same day at the end of the auc-

tion, or the following day. Some buyers actually specialise in "unsold lots." One firm of auctioneers, Conrad Ritblat, had an "unsold lots table "out-

side the main auction room at

one of their sales last year and

did a roaring trade as a result. In short, the auction can be used as a lever to effect a private

to sell by any other means, as it

will have been extensively mar-keted and have become " stale."

The situation is rare. Usually more than 90 per cent of all property offered at auction sells, provided a sensible reserve is agreed with the auctioneer (usually around 5-10 per cent below market valution). No self-respecting

tion). No self-respecting auctioneer will take on a prop-

erty where he knows the reserve is too high or, for one reason or

another, is not suitable for auction. A successful auctioneer is

only as good as his last sale, and both his reputation and his per-

centage success rates are on the line if he accumulates a high

always been as popular as they are today. In the 1960s they fell very much out of favour due to well when it is expected there the somewhat tarnished image attached to them as a result of being patronised and dominated by the residential dealer anxious to unload his blighted stock.

Well when it is expected there will be only one buyer for a certain property. In this case it is an ideal method of "flushing out" that special purchaser and ensuring that he pays at least the reserve price. The sale of the property by private treats

The property crash of the 70s such property by private treaty did not help their cause and it is very much harder to achieve was only during this decade that without that important element was only during this decade that they regained their position of trust and respectability. They are now firmly established as a valid method of sale for nearly all types of property being the property at auction. all types of property, being popular with both vendors and purchasers alike.

In the past the property auction market has been dominated by the residential market but the commercial side has now taken the lead.

The auction method is seen by the vendor as an effective method of sale because it achieves the best possible price within a specific period of time.

Auctions work well whenever there is a strong demand. Currently good secondary retail investments (dominated by Allsops) and unmodernised

ALTHOUGH property auctions houses (dominated by Barnard pared to accept realistic has been a substantial input of properties which are no longer very long time, they have not high prices in view of the An auction is able to offer the economic to hold.

houses such as Allsops and Bar-nard Marcus have a comprehensive list of over 10,000 potential buyers whom they circulate regularly. Coupled with intensive marketing and advertising, this tends to ensure a good attend-ance of buyers at the suction to

bid against each other. Some regular auction-goers some regitar auction-goers
are also not averse to buying
"blind," that is "off the catalogue," without either having
seen the property or having
made any legal inquiries before
bidding. This can be very advan-

tageous to sellers of difficult lots, provided that they are pre-

number of unsold lots.

The leading UK property auctioneers now dispose of over £500m worth of UK property each year, but they still prefer to keep their own house in order rather than have government legislation forced upon them. They are all members of the London Auction Mart, a selfgoverning body of 21 voluntary directors, all chartered surveyors and the majority practising auctioneers of leading firms. and presided over by Mr Peter Winfield, the senior partner of Healey & Baker, as chairman.

The mart has drawn up a code of conduct for practising auctioneers under the guidance of Mr Clive Carpenter, Allsop's or mr Chve Carpener, Ansops auctioneering partner, and this is in the process of being approved by the Royal Institution of Chartered Surveyors.

The London Auction Mart is not actually restricted to mem-

bers of the RICS. But to maintain a high standard in the interests of the public and the profession, they reserve the right to refuse an application to sell from their rooms if they think the auctioneer will not match their required standard. Auctions have also been sub-Mock Auctions Act 1961, and, most recent, the Auctions (Bid-

ding Agreements) Act 1969.

Property auctions were once dominated by the residential sector. But today secondary commercial investments represent the biggest sector. The rad Ritblat are hard on Alisops' today and contact introduction for the rad Ritblat are hard on Alisops' today and contact introduction for the rad Ritblat are hard on Alisops' today and contact introduction for the rad Ritblat are hard on Alisops' today and contact introduction for the rad Ritblat are hard on Alisops' today and contact introduction for the rad Ritblat are hard on Alisops' today and contact introduction for the rad Ritblat are hard on Alisops' today and contact introduction for the rad Ritblat are hard on Alisops' today and contact introduction for the rad Ritblat are hard on Alisops' today and contact introduction for the rad Ritblat are hard on Alisops' today and contact introduction for the rad Ritblat are hard on Alisops' today and contact introduction for the rad Ritblat are hard on Alisops' today and contact introduction for the rad Ritblat are hard on Alisops' today and contact introduction for the rad Ritblat are hard on Alisops' today are not contact in the rad Ritblat are hard on Alisops' today are not contact in the rad Ritblat are hard on Alisops' today are not contact in the rad Ritblat are hard on th sector. But today secondary commercial investments repre-sent the biggest sector. The method of sale is ideally suited to the break-up of property port-folios.

Nationalised Industries, like British Rail and British Coal, are great devotees of the auction route, and the streamlining rocks), some with the title Laird of state-owned assets, indus-tries and quangos, means there

The London Residuary Body has been a new entrant into the auction room in the post year, disposing of their unwanted assets through Hillyers and Strettons. Local authorities and many building societies are now using the auction as a method of sale, as are trustees, receiver and executors of estates. The Co-operative Wholesale Society became the single largest auction vendor last year, beating British Rail Property Board which had held the honour for

The inflow of secondary prop erties from large development companies has also increased, recently, to fund the refurbish-ment of older developments and clear the decks of properties which are labour-intensive to

treaty sale.

However, if a property does fail to sell, either before, during or immediately after the auction, it can then prove difficult manage. The residential sector itself is changing with an increase in unmodernised houses replacing the ever-dwindling tenanted stock which once formed a major part of residential auction catalogues. These changed circumstances have also brought about a new breed of aution catalogues the builder. auction-goer, the builder-developer, who has largely replaced the private property соправу.

The builder-developer is in turn having to compete with an increasing number of owner-occupiers who will bid for a house or flat needing mod-ernisation. With the benefit of easier mortgages, bank finance and, more recently, on-the-spot auction finance, arranged by some auctioneers themselves, owner-occupiers are able to outbid dealers and builders, pushing prices even higher and making profit even lower.

Very few new firms have joined the auction market in recent years. There are large costs involved in organising an auction (in the case of the leading firms it is a six-figure sum.
Non-auctioneering firms of
estate agents prefer to enter
their properties into one of the more established auction house and share sales. auctioneers' commission and success, without having to incur

any costs themselves.
A notable newcomer is Barnard Marcus, which has grown into the country's leading auctioneer of residential property after only eight years in the business.

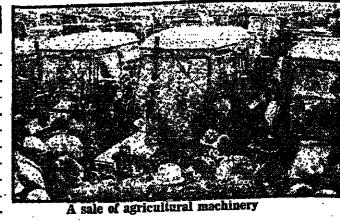

Another promising newcomer which entered the auction mar-ket late in 1986 was Folkard & Hayward. It joined forces with the old-established firm of Normans, and now looks set to cor-ner a significant slice of the residential market this year.

Meanwhile, J. Trevor & Sons, recommenced auctions in 1986, after an absence of some 10 Auctions have also been subject to some legislative regulation since the turn of the 18th
tentury. Today's auctioneers
must take due account of the
19th century Sale of Land by
Auctions Act, the Auctions (Bidding Agreements) Act 1927, the
tial auctioneers, starting commercial auctioneers, starting commercial auctioneers, starting commercial auctioneers, starting commotts, predominantly residen-tial auctioneers, starting com-mercial auctions, and Allsops and Conrad Ritblat, previously

Plant and machinery

When recession brings windfalls

THERE WILL always be companies that fail, and they will always require industrial plant auctioneers to dispose of their assets. Such is the view of Mr Nicholas Schoffeld, senior partner of Henry Butcher, the leading plant and machinery (P. & M.) auctioneers in Britain.

active," Mr Riddy explains. tracking pinpoint item of each popular. A 1977 Caterpilla model would make between \$2,000-£3,000." Cheffins acts location to more as a wholesaler with many large overseas buyers reselling them directly to individual farult.

M.) auctioneers in Britain.

The company prides itself on being a redistributor of assets. It handles the largest P. & M. auctions in Britain, and has a growing business overseas. "It might be considered a ghoulish business, but we are

providing a vital service," says Mr Schofield. It is also a business that is becoming increasingly international, with British firms searching out busi-ness on the Continent and US firms also expanding overseas.
"We began our foreign busi-

ness in earnest three years ago. Our approach was simple. Look at economies with zero or nega-tive growth which still had an

tive growth which still had an industrial infrastructure."

The world recession has provided a windfall for P. & M. auctions. A freefall in the oil price forced the cancellation of many Middle East projects, creating an upheaval in North Sea oil towns such as Aberdeen and among American oil industry fabricators.

The inability of many Third

World countries to pay debts has also meant good business for P. & M. auctioneers. In the UK, the closure by Caterpillar of its Scottish operations will bring further assets on to the market.

The volatility of world mar-

kets has also made it tough, however, for large companies like Butchers which has 50 per cent of its business overseas. It was caught out by the fall in the dollar last year. On one recent Malaysian deal it saw a 3 per manaysian dear it saw a 5 per cent shift in rates in less than a month, a move which can easily wipe out all the firm's profit on an auction.

As British industry begins to recover and available P. & M. auction stock dries up, Butchers and other auction firms are waiting for the shakeout in agri-

culture.

"The level of agriculture failure in Britain at the moment suggests that large plant makers will be experiencing problems during the year." says Mr Schofield. "We should be very busy." Mr Robert Hanson of Walker

gloomy on the prospects for European agriculture. "We simply grow too much food and don't eat enough of it. Subsidies must come down and so will prices."

John Riddy, partner in Chef-fins Grain & Chalk, specialises in agricultural auctions. The tractor market, a backbone of sales, is heavily dependent on exports with many of its 400 tractors sold last year ploughing Mid-East or Continental furrows this year.

"Belgian, Dutch and many activity can emanate.

Mediterranean buyers are It relies heavily on computer

offer an

shift to the best possible of sall site.

"Our concept of auctions is portable," says Mr Dinwoodle, and that's exactly what we intend to do with it."

In another approach now becoming more common many plants, or hold it for their own plants. them directly to individual far-mers. Many foreign markets have specific restrictions on importing tractors less than 10 years old thereby creating arti-ficially high demand and prices for machinery from the late

ficially high demand and prices for machinery from the late 1960s and early 1970s.

"Generous UK capital allowances on new equipment meant that many farmers bought too much and new tractor sales plunged by 25 per cent last year," says Mr Riddy,

All agree that auctions, as a sales medium, are achieving wider public acceptance. The standard 5 per cent commission.

standard 5 per cent commission slides rapidly on large sales. In the highly competitive US mar-ket, Butchers stress that hundredths of a percentage point in rates makes the difference in securing a disposal contract.

Another major international player is Ritchie Brothers of Richmond, Canada. Mr Dave Dinwoodle, manager of the international division, argues that P and M auctioneering is poised for a major change with a greater emphasis on dealing directly with the end-user rather than inviting or rather encouraging middlemen

ship in the US market, has total turnover of about \$300m and deals directly with the end-user of the plant about 80 per cent of the time.
"We see a market anywhere

provided there are imbalances in supply and demand, exchange rates or growth rates," says Mr Dinwoodie. "In the US there has also been a psychological shift in people's attitudes to auctions. Historically auctioneers were called in as a last resort in distressful situations. Now we are looking at business considering us as a first choice for the disposal of assets rather than a last chance."

"The upsurge in joint ven-tures in American industry, particularly in the building trade, has prompted major rationalisation of equipment levels and plant stock. These people see they have a chance of getting a top, even a guaran-teed, price by using our method of sale."

Ritchies plans to expand its European operations which are located in the Netherlands as the EEC economies pick up and arbitraging opportunities develop owing to currency factors.

Agricultural Land

Only the stars benefit

THE PAST year has been another depressed one for the agricultural sector. In an uncertain market farms are generally sold by private treaty; auction is only used for the best property

of its type.
In the investment market there has been little or nothing sold under the hammer with tenants buying their farms by

Private treaty.

However, where there were auctions during 1986, they were the stars of the market. In particular, holdings with an attracticular, tive house commanded high prices even when the land was of moderate quality. This par-ticularly applied where the farms were close to the motor-way corridors where access to

Jones Lang and Wootton recommend between 5 per cent and 10 per cent below its opin-ion of value as reserve although nature of the lots is changing. Commenting on Conrad Ritb-lat's activities over the past five years, Simon Riggall said: "The market has grown for us mainly in the quality of the lots we deal with and from that the value has in some cases even greater leeway may be suggested.
"Our philosophy is to agree

reserves early rather than blame the client after a duli sale for insisting on reserves which are too high.

which are too high.

"Occasionally we are prepared to 'take a punt' with an
unusual or unpredictable property to see how the market
reacts," Mr Christopher Drury
of JLW observes.

The commercial auction market is concentrated in London
and based on the London Auction Mart's home, the Connaught

expected to buy tertiary properties at auction, they are now looking for quality lots. Even if there is a general decline in the property market I don't see a drop in auction activity at all. In fact even more properties might tion Mart's home, the Connaught Rooms in Great Queen Street. However, Manchester has a strong representation in the form of Longden and Cook and north of the border McEvoy years ago we dealt almost exclu-years ago we dealt almost exclu-sively with small retail lots. Now we deal with the larger shops, industrials and offices although the market for offices is very thin. Our average lot size Vigers are the major indigenous

These two firms have historically relied on lots put up by the British Rail Property Board which are now decreasing in both quality and quantity, so the market for these areas seems more uncertain than that for the thriving South East.
Unless the political complex

"We don't see our particular market diminishing although this does depend to a certain next election."

Success with selling at auction depends to a very large extent on the setting of realistic reserves. A lot of auctioneers have a strict policy on this and if

So in effect the same ances would we contemplate properties are passed from putting property up for auchand to hand over a period of time and it is not uncommon to Housing land has proved a see the same house come up runaway success under the time and time again, albeit in hammer. The most successful different auctioneers' cata-auctioneers in this field have

different auctioneers' catalogues.

Until now, it has not been Jones Lang Wootton, offercommon for a private buyer to
purchase his house at auction,
as is the case in Australia where
the majority do. However, this
could change and the building
societies have shown thematternative of the property auction.

In July last year the firm sold
a 10 32-acre residential

seives willing to finance such home owners.

The Woolwich Building Society say that applications for mortgages for buying at auction are rare in their experience.

They said: "They could be counted on the fingers of one hand. There would have to be a valuation and an inquiry into valuation and an inquiry into status. There would also be a limitation on the amount of money we could offer depending on how much was paid at auction. The time factor is a problem but it is possible to grant mortgages for auctions in general terms."

The Leeds think they are progressive in their attitude to potential clients using auctions. "If someone wants to buy a we would get a valuation done and issue a letter of intent which covers the legal aspects,' it points out.

On the other side of the coin mortgage arrears are now lead-ing building societies to put up houses for auction in order to

The Abbey National offered 31 such properties at Willmotts sale last April. Although the society came away £92,350 better off, only 13 of the lots sold.

development site in West Lon-

Other notable sales for both BRPB and JLW include a 13.2acre housing development site at Goodwood Road, Sanford Street, New Cross Gate, London SE14, which together with a 1.25-acre industrial site, was knocked down at £5.45m. The complete opposite to the type of houses offered by Barnard Marcus and Willmotts is the country house or town house, attracting prices of £500,000 and over.

A recent entrant to this sector has been Allsop & Co and the firm have taken on an auctioneer specifically to deal with this side of the business. Knight Frank & Rutley, well known for their involvement in

the private treaty side of country house sales, also hold the occasional auction.

KFR says it would like to see more vendors bringing large properties to auction.

"An auction can be very successful if there are a lot of people bidding. Also, in a trus-tee sale where there are a number of beneficiaries you get a lot of people and it develops a sense of occasion. The sale is also absolved from any abuse from beneficiaries," Mr John Inge, a partner with KFR points

PROFESSIONALS

the auction houses are the obvious market place if dealers want to dispose of goods quickly.

The very success of Sotheby's and Christie's is now their main problem. In the autumn season Sotheby's boosted turnover by 77 per cent, to £331m, mainly because of the boom in the Impressionist and the modern picture market. Christie's man-

& McKenzie

the Japanese into a nation of buyers of western art, especially impressionist pictures.

The boom in the auction houses has converted art into an investment market and many wealthy men are now trading in Renoirs and Brueghels with the same confidence that they buy and sell gold or gilts.

It is very much an inter-national market. But then the auction houses have become just as international New York is now as big a market for Sothebys and Christie's as London (if not bigger) and the sale-rooms are looking at opening branches in Germany and the Far East. One of the factors behind the recent boom has been that pictures have been sold in weak currency mar-kets-London, New York, Hong Kong-but bought by buyers from strong currency homes-Japan, Switzerland, Germany.

But it is not all coming up roses for the auctioneers. Christie's recently settled a difficult legal case in New York brought by a disgruntled client who did not get what he expected from his collection of paintings sold at auction and along with Sotheby's they face a challenge from local authorities in New York and London about some of their "Spanish man, but the price is largely confined to special occasions in provincial auction houses, but any strange active buyer at a sale dominated by dealers. as in areas like some of their "Spanish pracsome of their "Spanish practices"—notably taking bids from

There is also the real threat of
who dislike newcomers.

The imposition of VAT on the

By fixing a reserve you can the imposition of VAT on the import of works of art which could greatly reduce the attrac-

tion of London as a major market place

But the headlines about record prices give a misleading impression of the world of the fine art auctioneer. Two thirds of all the lots sold at Sotheby's go for less than £500, and the real trade is through the hun-dreds of local auctioneers who their locality.

They attract the dealers, and

any prize item sold in a provincial saleroom is likely to make a speedy journey to London. Sotheby's and Christie's, with their high overheads, are increasingly reluctant to handle low-priced items: Christie's has its South Kensington operation to handle such goods, while Sotheby's sends them to its satellite auction rooms at Pulborough and Chester.

The third British auction house, Phillips, makes a virtue in handling the medium and low-priced articles. It will take most things from, say, a deceased estate, offering them through its three London outlets or its provincial chain of 15 salerooms. It cannot match the high prices of Sotheby's and Christie's so it concentrates on

By fixing a reserve you can

Rock n' Roll items in a Sotheby's sale.

low prices: it is best to take the advice of the salerooms and not to insist on too high reserves. If you have some really choice properties to sell you need not expect to pay the full 10 per cent commission that the salerooms usually extract from the vendor-competition between them ensures that they will take a reduction to secure goods which will sell for £1m or so and bring them in a comfortable £100,000 plus from buyers.

Not all the procedures in a saleroom would stand the scrutiny of the most fastidious seeker after truth and justice but they remain a quick and public way of buying and selling works of art. There are hidden charges—for insurance, for catalogue illustrations, etc.— which eat into the rewards to the vendor, and many potential buyers are disappointed to find that catalogue estimates are usually exceeded on the day. But after you have researched the do's and dont's you stand a good chance of selling goods at good chance of setting goods at auction on a booming market and buying them at prices con-siderably less than those demanded by dealers.

Antony Thorncroft

Auctioneers A need for guidelines

The future of the auction sector will also depend on the state for will also depend on the state of the rest of the property market. The auction world is dominated by secondary property and any shift in investment criteria by, for example, the big institutions, could make the market move either way.

State to per tent, the block will still have some life left in it at the end of the 10-year span in which the capital is recouped. If the institutions were to move in on the auction market as buyers in could mean the squeezing out of the traditional dealers and small

At present, the institutions and pension funds devote their limited property spending to prime City offices, which show yields of about 4.5 per cent, prime shopping, with yields of around 5.5 per cent, and occasionally prime industrials which short yields of approximation. which show yields of approximately 8 per cent.

Sales of office blocks are rare at auction. Shops show yields of between 6.5 per cent and 10 per cent, and industrials an average of about 14 per cent.

Some are suggesting that funds should look towards the secondary market more. Such investment produces a more immediate return which might go towards staving off the secondary of the secondary market more. Prices hold up well

car dealers, and the general public. Through aggressive development by such groups as

British Car Auctions, the mar-ket is developing rapidly and expanding both geographically and qualitatively. What distinguishes car auctions from other auctions is the ready market for the sale items—as most households in

Britain aspire to owning or lie Allen, managing director actually own a car—and the and managing editor of Glass's relatively high unit price achieved at the sale. "Average prices can be mis-"Average prices can be misleading," says Mr David Wickins, chairman of British Car
Auctions, the leading UK motor
auction group. "Our average
sale is £1,700, but that is
deflated by sales of old Post
Office vans for about £130 each.

An average sale for a fine art auction house is only £800 even though you only seem to hear about the huge multi-million pound art sales. Every auction house has large and small

Out of a total of 6.5m cars sold in Britain last year, used cars represented nearly 5m units. Of that, private buyers purchased about 2.8m used cars. The trade proportion of sales has slipped in recent years on a growing public desire to eliminate middlemen.

THE UK car auction market has developed into one of the most sophisticated in the world.

It is a vital link between fleet operators, small second-hand car dealers, and the general than in lots of five or 10, enabling private buyers to bid.

Many used car dealers who cannot afford a large inventory

Guide Services, the vehicle valuation organisation. "Many people cannot afford new cars, prices of which are likely to rise during 1987. This should thus be a very good year for used cars." Auction prices have held up

very well in recent months Few cars are imported for auction and even fewer exported. The right-hand drive feature of British cars pre-cludes this.

The leading UK car auction to group is British Car Auctions. It sells over 500,000 vehicles (mainly cars) annually which represents almost 60 per cent of the entire auction market. Through its Anglo-American Auto Auctions, it holds about 15 per cent of the US used car market, representing a further 700,000 cars a year. In the UK, about 90 per cent of

MORISE

BCA charges a basic 7½ per cent commission on the sale of individual cars but this drops to Many used car dealers who cannot afford a large inventory use car auctions to fill specific orders taken from private customers.

"The traditional reasons for buying used cars at auction or elsewhere persist," says Mr Leslie Allen, managing director and managing editor of Glass's individual cars but this drops to just under 4 per cent on large fleet disposals. Most of the large fleet or leased vehicles through BCA. Ford sells over 10,000 cars a year at a flat fee of £105 per vehicle (plus £12 cleaning) regardless of how much it will regardless of how much it will regardless of how much it will regardless of how much it will regardless of how much it will reserve the control of the large fleet disposals. Most of the large fleet disposals. Most of the large of the similar arrangements.

Since BCA has a minimum £50 handling commission per sale, there is little wreck or scrap throughout aithough all the cars are sold on a strictly " as-seen "

The group operates up to 38 car auctions per week from its 14 UK locations. Total sales last year were £1.7bn with profits just under £14m. Sales in 1987 are expected to exceed £2bn for the first time and profits could top £17m according to some City

in mainland Britain, the backbone of the BCA is the Black-bushe Airport complex off the M3. Here a car can be auctioned

every 80 seconds.

BCA is believed to be up for sale and 67-year-old Mr Wickins is thought likely to retire soon.

CONSTRUCTION CONTRACTS

Tourist hotel in China

BECHTEL is helping to meet the burgeoning demand for tourist accommodation in Xian, China, a city that has a history of more than 2,200 years, by designing a US\$30m (£19.5m) hotel. China American International Engineering, Inc (CAIEI), Bechtel's joint venture engineering and construction company in China, has completed the conceptual design and started preliminary engineering on the international class Guoan

Hotel. The 16-storey, 482-room facility will be built on central Fenghao Road in the western suburb of Xian, at the starting point of the re-nowned "Silk Road," an ancient trade route that dates back to 200 AD.

The facility will be owned by Guean Hotel, a joint

venture between China International Trust and Investment Corporation (CITIC) of Belling, Northwest Feipeng, of Kiau, and Shortridge of Hong Kong. It will be operated by the Sheraton Corporation. CAIEI is co-operating with the China Northwest Building Design Institute of Xian to complete design and engineering of the contemporary hotel.

The hotel will include 466 guest rooms, 15 executive suites and a presidential Public facilities will include three restaurants, a coffee shop, cocktail lounge, banquet facilities, meeting rooms, swimming pool, health club and several lobby shops. Completion is scheduled for

Rian, designated by China

portant tourist cities, is brim-ming with history. More than 12 dynasties, dating back to the 11th century BC, have resided there. In their wake they left magnificent palaces, mausoleums, temples and pagodas. Just a few miles away is one of the wenders of the world, Emperor Qin's terra-cotta warriors and horse

With the continuous excavation of ancient remains and the establishment of a new airport in Xian, the fourist industry is growing rapidly. Last year more than 280,000 foreign guests visited the city and the number is expected to increase considerably this year. CAIEI is a joint venture between international Bechtel, Inc and CITIC.

Kyle Stewart builds superstores

A contracts package worth £40m for design and construction of superstores for Tesco and Marks and Spencer has been won by RYLE STEWART. Largest of the three projects is a joint development at Brookfield Farm, next to the Alo at Cheshunt, Herts. Work has just started on a project worth £18m. It includes enlargement of the £3,000 sq ft Tesco store on the site to 95,000 sq ft; construction of a new sq ft; construction of a new 95,000 sq ft Marks and Spencer store; a link entrance containing

up to 1,900 car parking spaces, and alterations to link roads.

next year.
At Watford, Herts, work has also started on a £12m development of a former brewery site, to provide a 74,000 sq ft Tesco superstore, due for completion early next year. In a massive earth-moving operation, the entire site level is being raised

Paddington re-roofing Thirteen acres of glass and plastic are being demolished at Paddington Station in a \$4.5m restoration project. Around \$0,000 passengers and many thousands of sacks of mail cross on this part of the roof, which was built in 1930, will be comthe Lawn, as Paddington's con-course is known, every day. Because of the constant activity within the confines of the Lawn. engineers will construct a pro-tective cocoon of scaffolding and Jaguar Cars has awarded a timber enabling the station to continue functioning almost normally. The £304,000 contract for the renewal of the roof above the Lawn has been placed with A. MONK AND CO. Glass panels

pleted by late summer 1987. In the autumn work on the roof, designed by Brunel and a Grade 1 listed structure, will begin and in four years the bulk of the 12-acre roof will be completely

£382,000 contract to BALFOUR BEATTY BUILDING for the upgrading of part of the perimeter road at its factory at Brown Lane, Coventry. In Sheffield, Balfour Beatty will construct a multi-screen cinema valued at £2.4m under an extension to a contract from Chesterfield Properties at its Crystal Peaks will be stripped from the roof, the steelwork will have some minor repairs and a coat of paint, then glass-reinforced plastic panels will be fitted. Work for completion in May 1988. Development. The works are due

diverted; a new weir provided, and a major reinforced concrete road bridge constructed as part of a link with the M1 motorway.

The third project is at Copdock Mill, Ipswich, where a 71,000 sq ft superstore is being provided under a £10m contract. Work includes construction of a link road to the A12, a petrol filling station, restaurant, coach, lorry and customer car parks, and a bus lay-by. Overall completion is due later this year.

Space theatre for Dublin

TANDATA has won a £5.5m contract to build Ireland's Dun Laoghaire Space Theatre. Sister company, developers Tandata (Ireland), is to build the "Tomorrows Ireland" complex in the heart of Dublin, a complex likely to generate between 400,000 and 500,000 visitors each year. The estimate is based on year. The estimate is based on the experience of cities in North America where the en'ire con-cept of the Space Theatre is relatively new. The complex will be first of its kind in the country, Europe's third and one of the most modern facilities of its type in the world. Building will start shortly on the site of will start shortly on the site of the former Pavillion Cinema.

Leadenhall development

TROLLOFE AND COLLS CON-STRUCTION (a member of the Trafalgar House Group) has been awarded a £19.6m contract to build a seven-storey office and retail development at Leadenhall Court, EC3, by The Legal and General Assurance Society. The reinforced concrete structure reinforced concrete structure will provide a floor area of 181,900 sq ft. The retail units, which will have aluminium fronts and doors, will be at ground level, and the offices will be centred around a tropically planted atrium, on floors one to six. The atrium roof is to be covered with double-glazed aluminium-framed glazing on a tubular structure, and a granite atubular structure, and a granite floor. Construction has started for completion at the end of February 1989. The Museum of London has a watching brief until completion of the excava-

Steel caster at Rotherham

TARMAC CONSTRUCTION is to help lay the foundations for introducing a continuous steel-casting process at Rotherham Engineering Steels' Aldwarke works. The company has won a £16m silce of the Aldwarke bloom caster project, a £65m steel-casting modernisation programme for RES, part of the United Engineering Steels Group. The contract involves construction of a large building with foundations up to 21 metres below ground level. The project will involve pouring extensive mass concrete and reinforced concrete foundations. Tarmac Construction's work — which at its peak will have a 200-strong workforce — also concerns overcoming the problem of driving foundations through existing acseams. Construction work inremoval of 70,000 cu metres of earth, pouring 50,000 cu metres of concrete and using \$3,000 tonnes of steel reinforce-

City bank expands

A £12.5m .contract for an office development at 17-19 Throgmor-ton Avenue and 21 Austin Friars in the City has been awarded to JOHN MOWLEM AND CO by MEPC. The building will form a new headquarters for merchant bankers Morgan Grenfell and Co. The 55,000 sq ft net desclopment will be built or the state of the development will be built on ment, lower ground, ground floor and six floors above, the top two being within the slated mansard roof. Construction will be reinforced concrete frame with a central atrium and classical exists. cal style Portland stone facades designed to match the Victorian designed to match the Victorian facade on the Austin Friars elevation which is being retained. There will be link bridges to No 23 Great Winchester Street which is also occupied by Morgan Grenfell and the old vaults underneath the road are being retained as part of the scheme. The basements will be of watertight construction with a special tanking membrane. Finishes tanking membrane. Finishes will be to a high standard with extensive use of marble, fibrous plaster ceilings and hardwood skirtings. Work has just started

for completion in April 1988.

TRADING WITH TURKEY

ARE YOU NEW TO BUSINESS IN TURKEY? OR FRUSTRATED BY UNANSWERED TELEXES AND-WASTED EFFORT ?

IN EITHER CASE YOU HAVE ALREADY SEEN THE EXCITING POTENTIAL OF AN UNRIVALED EXPANSION PROGRAMME IN HOUSING AND PORT CONSTRUCTION, DREDGING, AND INFRA-STRUCTURE DEVELOPMENT

But how to cash in on the business economically and effectively whilst avoiding the omnipresent financial and bureaucratic pitfalls, that is the question.

The answer is simple, talk to CERMAR your business partner in Turkey. Established by special authority from the Turkish government and as part of a major group, we have almost 150 years of experience backed up by a comprehensive network of offices to assist you in expanding your business both profitably and pleasurably.

Whether large or small, CERMAR can provide you with all the logistical and commercial support you will need to open doors and get your business on the move. Contact us today and see how we can help you quickly and efficiently towards your first orders.

Cermar Maritime Enterprises, International House, World Trade Centre, 1 St Katharine's Way, London E1, UK. Tel: 01-265 1821. Telex: 892592. Attention: Jonathan Martin.

Washington cautious despite trade improvement

THIS IS likely to be a week when the foreign exchanges are mainly influenced by comments from officials in the US, Europe and Japan. In Washington there may be some explaining to do, after Mr James

Baker, US Treasury Secretary, said December's trade deficit was likely December's trade deficit was likely to be similar to November's figure, which was reported at a record \$19.2bn. Mr Clayton Yeutier, US Trade Representative, warned he expected no improvement in the deficit, but the December shortfall turned out to be a much better figures were published on Friday the November deficit was revised

down to \$15.44bn, after new information on actual shipments, but the US Commerce Department cautioned against comparing revised and unre-

vised monthly figures.

Remarks by Mr Baker and Mr Yeutter had encouraged forecasters that the December deficit could be over \$20bn, although immediate ahead of the announcement on Friday the dollar was recovering on short covering, as forecasts were revised downwards. According to Money Market Services the median estimate was for a deficit of \$13.8bn.

US strategy is likely to concentrations of the dollar.

US strategy is likely to concentrations.

The short covering reflected the

very wide range of forecasts, but not many were in the region of \$10bn.

There was some caution however on the way the deficit had been
reduced. It resulted from a sharp
fall in the value of imports to \$29.1bn
from \$37.8bn, while exports were
virtually unchanged at \$18.43bn.
Rumours circulated for most of
the week about an early meeting
of Group of Five Finance Minis-

US strategy is likely to concentrate on the overall picture when

DM 11.6bn (\$6.3bn) from DM warned that the December figure 10.2bn in November. did not necessarily indicate a downward trend, while Mr Yeutter cautioned that despite the progress the deficit is still

unacceptably high.
This may indicate that the US is prepared to maintain a tough line with its trade partners, particularly Japan.

· Earlier in the week Mr Satoshi Sumita, Governor of the Bank of adds the deficit will not go away

guickly. On this basis Capel still
regards the dollar as vulnerable
After the trade announcement
Mr Baker and Mr Yeutter
remained cautious. Mr Baker

Sumita, Governor of the Bank of
Japan, appeared to threaten the
US position on trade and
exchange rates by suggesting the
weaker dollar is likely to reduce
capital flows from Japan to the
US.

MONEY MARKETS

London watches passively

LONDON INTEREST rates showed
little change last week. The mood
was generally pessimistic about the
ness generally possible about the
prospects for lower bank base rates.
Sterling spent most of the period
improving against the dollar but los-
ing ground to the D-Mark, and seve-
ral other major currencies. On
Wednesday the pound touched a
record closing low of DM 2.7450, but
the situation was reversed on Friday
- LANDAN ISTERNATION

UK clearing bank base lending rate 11 per cent since October 15

after the sharp reduction in the US trade deficit. Sterling recovered to DM 2.7725, almost back to the level at the end of the previous week, but retreated to \$1.5135, a fall of 2.40 cents on the day, and about 1 cent on
